"Luca's book was so helpful to my work. Opened my eyes up to some more reasons why change is so hard."- Chris Murman on Luca's first book. This book is for you if: - You like books dense of information - You appreciated books such as Taleb's Antifragile - You understand or are willing to accept that the world is dynamic, and that understanding how something changes is more important than understanding how something works now. - You do not like usual business/self-help books which provide solutions which only work in the short-term - You understand that some effort is needed in order to achieve long-lasting improvement This book is not for you if: - You are easily triggered by ideas you do not like - You want a simple book which will magically solve all your problems "The Power of Adaptation" focuses on the topic of adaptation as the main force shaping the world as we know it. However, adaptation is an emergent process and thus cannot be understood with narratives nor it can be acted upon directly. This book aims to describe the basic phenomena which weave together into what we perceive as adaptation and to provide a guide to help the readers practicing the four behaviors that will help him harness, rather than fight, change.

Faputa's fury shows no sign of ending! Does Reg or anyone else stand a chance of stopping her? Meanwhile, just when it seems like things can't get any worse, terrifying primeval monsters breach the village's defenses! Will anyone survive the coming onslaught?

Riko and Reg have left the Seeker Camp and ventured further into the Abyss! The mysteries and peril that await them are the stuff of nightmares--but these nightmares are ruthless, deadly and very real. Do they have the courage and strength to survive as they descend into the deeper layers?

"How does one get to be an artist? How does one get to be anything at all? It's not as if we come into the world with pre-set destinies, or do we? and if we do, what's actually baked in, what's learned, what's a product of circumstance? Jackson Pollock started by painting Jungian archetypes in what are called his psychoanalytic drawings. He moved on to Picassoesque figurative work, as in "Guardians of the Secret" and "Moon Woman Cuts the Circle." Then, one average day, he threw a canvas on the floor. He became, miraculously, Jack the Dripper. What he'd done was so unforeseen, so puzzling, legend has it he turned to his partner Lee Krasner (herself a painter) and asked, "Is this art?"--

THE #1 NEW YORK TIMES BESTSELLER 'Everything you need to know about one of the deadliest outbreaks in human history' **Bill Gates** 'Easily our fullest, richest, most panoramic history of the subject' *New York Times Book Review* In 1918, the world faced the deadliest pandemic in human history. What can the story of the so-called Spanish Flu teach us about the fight against present day crises, and how to prepare for future outbreaks? At the height of WWI, history's most lethal influenza virus erupted in an army camp in Kansas, moved east with American troops, then exploded, killing as many as 100 million people worldwide. It killed more people in twenty-four months than AIDS killed in twenty-four years, more in a year than the Black Death killed in a century. But this was not the Middle Ages, and 1918 marked the first collision of science and epidemic disease. Magisterial in its breadth of perspective and depth of research, *The Great Influenza* is ultimately a tale of triumph amid tragedy, which provides us with a precise and sobering model as we confront the aftermath of Covid-19 and future pandemics looming on the horizon.

BEASTARS

Toward the end of the year 1920 the Government of the United States had practically completed the programme, adopted during the last months of President Winthrop's administration. The country was apparently tranquil. Everybody knows how the Tariff and Labour questions were settled. The war with Germany, incident on that country's seizure of the Samoan Islands, had left no visible scars upon the republic, and the temporary occupation of Norfolk by the invading army had been forgotten in the joy over repeated naval victories, and the subsequent ridiculous plight of General Von Gartenlaube's forces in the State of New Jersey. The Cuban and Hawaiian investments had paid one hundred per cent and the territory of Samoa was well worth its cost as a coaling station. The country was in a superb state of defence. Every coast city had been well supplied with land fortifications; the army under the parental eye of the General Staff, organized according to the Prussian system, had been increased to 300,000 men, with a territorial reserve of a million; and six magnificent squadrons of cruisers and battle-ships patrolled the six stations of the navigable seas, leaving a steam reserve amply fitted to control home waters. The gentlemen from the West had at last been constrained to acknowledge that a college for the training of diplomats was as necessary as law schools are for the training of barristers; consequently we were no longer represented abroad by incompetent patriots. The nation was prosperous; Chicago, for a moment paralyzed after a second great fire, had risen from its ruins, white and imperial, and more beautiful than the white city which had been built for its plaything in 1893. Everywhere good architecture was replacing bad, and even in New York, a sudden craving for decency had swept away a great portion of the existing horrors. Streets had been widened, properly paved and lighted, trees had been planted, squares laid out, elevated structures demolished and underground roads built to replace them. The new government buildings and barracks were fine bits of architecture, and the long system of stone quays which completely surrounded the island had been turned into parks which proved a god-send to the population. The subsidizing of the state theatre and state opera brought its own reward. The United States National Academy of Design was much like European institutions of the same kind. Nobody envied the Secretary of Fine Arts, either his cabinet position or his portfolio. The Secretary of Forestry and Game Preservation had a much easier time, thanks to the new system of National Mounted Police. We had profited well by the latest treaties with France and

England; the exclusion of foreign-born Jews as a measure of self-preservation, the settlement of the new independent negro state of Suaneë, the checking of immigration, the new laws concerning naturalization, and the gradual centralization of power in the executive all contributed to national calm and prosperity. When the Government solved the Indian problem and squadrons of Indian cavalry scouts in native costume were substituted for the pitiable organizations tacked on to the tail of skeletonized regiments by a former Secretary of War, the nation drew a long sigh of relief. When, after the colossal Congress of Religions, bigotry and intolerance were laid in their graves and kindness and charity began to draw warring sects together, many thought the millennium had arrived, at least in the new world which after all is a world by itself.

One night at Cherryton Academy, an herbivore student is brutally murdered. Among the members of the Drama Club, the herbivores' suspicions naturally turn to their carnivore classmates... The prime suspect? Wolf Legoshi. But he wouldn't hurt a fly. Or would he? Will dwarf rabbit Haru bring out the beast in him? Or are his feelings for her...something else? -- VIZ Media
