Atampt Aspire Grant Application Guidelines

The Prevent strategy, launched in 2007 seeks to stop people becoming terrorists or supporting terrorism both in the UK and overseas. It is the preventative strand of the government's counter-terrorism strategy, CONTEST. Over the past few years Prevent has not been fully effective and it needs to change. This review evaluates work to date and sets out how Prevent will be implemented in the future. Specifically Prevent will aim to: respond to the ideological challenge of terrorism and the threat we face from those who promote it; prevent people from being drawn into terrorism and ensure that they are given appropriate advice and support; and work with sectors and institutions where there are risks of radicalization which need to be addressed

Is your organization ready to develop the leaders it needs? As the workforce continues to age, finding new leaders will become more and more challenging. You can prepare by cultivating high-potential employees now and creating a pipeline of leadership talent. This issue of TD at Work can help you grow leaders within your organization so they're ready to take the reins when current leaders leave. In "Developing a Leadership Pipeline," Annette Cremo and Tom Bux describe the challenges companies face when filling leadership positions, explain how to differentiate high potentials from high performers, and present an action plan for developing high-potential employees. This issue includes: · best practices for developing a leadership pipeline · effective learning activities for leadership candidates · a model mentoring training program · an organization development planning tool · an individual development plan.

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Sustainable development is still seen by authorities as an abstract concept. Local Environmental Auditing will help put it into practice. The book provides a comprehensive guide to monitoring the state of the local environment and establishing the impacts of local actions on global issues, and shows how current local authority policy and practice can be adapted to recognize environmental priorities. The authors provide both a guide to and an assessment of the subject: they link the processes with the issues, with specific information on carrying out the audit (including checklists, case studies and standards) and a detailed discussion of the issues and choices which local authorities may face. Clearly structured and accessible, this will be an essential handbook, both for local government departments and other local organizations, and students in a wide range of subjects, including environmental science and health, town planning, urban and rural studies, social science and politics.

This book examines how museums balance diverse funding sources to provide sustainable revenue within the parameters of their nonprofit status. Museum professionals and representatives from the revenue sources provide multiple points of view on creating successful relationships.

Creating a College is a collection of President Volpes annual addresses on the state of the College of Staten Island. They constitute a history of the early years of the College, which was established in 1976 by the merger of an upper division institution, Richmond College and Staten Island Community College. The fiscal collapse of New York City in 1975 led to the unification of the two City University of New York institutions on Staten Island. The complex process of merging two disparate institutions, with differing missions and educational philosophies at two locations, miles apart, during a period of severe fiscal constraint is recorded in these eighteen addresses. Such a merger has been a rare occurrence in American higher education. Its end result was the creation of a new type of institution, the comprehensive college.

The Directory provides the most accurate and current data on funds available from foundations, private sources, and state and local organization, as well as federal sources. The lastest facts are presented on nearly 6,000 sources, including 300 programs identified for the first time. All major disciplines and subject areas are covered. The Directory provides the most accurate and current data on funds available from foundations, private sources, and state and local organization, as well as federal sources. The lastest facts are presented on nearly 6,000 sources, including 300 programs identified for the first time. All major disciplines and subject areas are covered. Programs listed include funding for basic research, materials and equipment acquisition, centers, dissertation research, faculty development, and symposiums.

Is a career as a professor the right choice for you? If you are a graduate student, how can you clear the hurdles successfully and position yourself for academic employment? What's the best way to prepare for a job interview, and how can you maximize your chances of landing a job that suits you? What happens if you don't receive an offer? How does the tenure process work, and how do faculty members cope with the multiple and conflicting day-to-day demands? With a perpetually tight job market in the traditional academic fields, the road to an academic career for many aspiring scholars will often be a rocky and frustrating one. Where can they turn for good, frank answers to their questions? Here, three distinguished scholars—with more than 75 years of combined experience—talk openly about what's good and what's not so good about academia, as a place to work and a way of life. Written as an informal conversation among colleagues, the book is packed with inside information—about finding a mentor, avoiding pitfalls when writing a dissertation, negotiating the job listings, and much more. The three authors' distinctive opinions and strategies offer the reader multiple perspectives on typical problems. With rare candor and insight, they talk about such tough issues as departmental politics, dual-career marriages, and sexual harassment. Rounding out the discussion are short essays that offer the "inside track" on financing graduate education, publishing the first book, and leaving academia for the corporate world. This helpful guide is for anyone who has ever wondered what the fascinating and challenging world of academia might hold in store. Part I – Becoming a Scholar * Deciding on an Academic Career * Entering Graduate School * The Mentor * Writing a Dissertation * Landing an Academic Job Part II – The Academic Profession * The Life of the Assistant Professor * Teaching and Research * Tenure * Competition in the University System and Outside Offers * The Personal Side of Academic Life

To this day, the belief is widespread that the Taliban and al-Qaeda are synonymous, that their ideology and objectives are closely intertwined, and that they have made common cause against the West for decades. In An Enemy We Created, Alex Strick van Linschoten and Felix Kuehn debunk this myth and reveal the much more complex reality that lies beneath it. Drawing upon their unprecedented fieldwork in Afghanistan, as well as their Arabic, Dari, and Pashtu skills, the authors show that the West's present entanglement in Afghanistan is predicated on the false assumption that defeating the Taliban will forestall further terrorist attacks worldwide. While immersing themselves in Kandahar society, the authors interviewed Taliban decision-makers, field commanders, and ordinary fighters, thoroughly exploring the complexity of the relationship between the Taliban and al-Qaeda and the individuals who established both groups. They show that from the mid-1990s onward, the Taliban and al-Qaeda diverged far more often than they converged. They also argue that this split creates an opportunity to engage the Taliban on two fundamental issues: renouncing al-Qaeda and guaranteeing that Afghanistan will not be a sanctuary for international terrorists. Yet the insurgency is changing, and it could soon be too late to find a political solution. The authors contend that certain aspects of the campaign in Afghanistan, especially night raids, the killings of innocent civilians, and attempts to fragment and decapitate the Taliban are having the unintended consequence of energizing the resistance, creating more opportunities for al-Qaeda, and helping it to attain its objectives. The first book to fully untangle the myths from the realities in the relationship between the Taliban and al-Qaeda, An Enemy We Created is essential reading for anyone who wants to understand what's really happening in Afghanistan.

What are the key issues in FE? How does FE differ from other sectors of Education? What does the future hold for FE? This book offers a unique and provocative guide for all lecturers committed to providing the best education and training possible in the changing world of Further Education. The authors examine key issues such as: How teaching in FE differs from others sectors The motivations of learners The use of new technologies in the classroom The techniques adopted by college managers The changing assessment methods The introduction of personalised learning An analysis of the politics behind the training of lecturers. Written in an accessible style, every chapter presents a different and challenging approach to key issues in Further Education. A Lecturer's Guide to Further Educationis essential reading for all new and experienced Further Education lecturers.

This review incorporates the views and visions of 2,000 clinicians and other health and social care professionals from every NHS region in England, and has been developed in discussion with patients, carers and the general public. The changes proposed are locally-led, patient-centred and clinically driven. Chapter 2 identifies the challenges facing the NHS in the 21st century: ever higher expectations; demand driven by demographics as people live longer; health in an age of information and connectivity; the changing nature of disease; advances in treatment; a changing health workplace. Chapter 3 outlines the proposals to deliver high quality care for patients and the public, with an emphasis on helping people to stay healthy, empowering patients, providing the most effective treatments, and keeping patients as safe as possible in healthcare environments. The importance of quality in all aspects of the NHS is reinforced in chapter 4, and must be understood from the perspective of the patient's safety, experience in care received and the effectiveness of that care. Best practice will be widely promoted, with a central role for the National Institute for Health and Clinical Excellence (NICE) in expanding national standards. This will bring clarity to the high standards expected and quality performance will be measured and published. The review outlines the need to put frontline staff in control of this drive for quality (chapter 5), with greater freedom to use their expertise and skill and decision-making to find innovative ways to improve care for patients. Clinical and managerial leadership skills at the local level need further development, and all

levels of staff will receive support through education and training (chapter 6). The review recommends the introduction of an NHS Constitution (chapter 7). The final chapter sets out the means of implementation.

Featuring a timely presentation of total survey error (TSE), this edited volume introduces valuable tools for understanding and improving survey data quality in the context of evolving large-scale data sets This book provides an overview of the TSE framework and current TSE research as related to survey design, data collection, estimation, and analysis. It recognizes that survey data affects many public policy and business decisions and thus focuses on the framework for understanding and improving survey data quality. The book also addresses issues with data quality in official statistics and in social, opinion, and market research as these fields continue to evolve, leading to larger and messier data sets. This perspective challenges survey organizations to find ways to collect and process data more efficiently without sacrificing quality. The volume consists of the most up-to-date research and reporting from over 70 contributors representing the best academics and researchers from a range of fields. The chapters are broken out into five main sections: The Concept of TSE and the TSE Paradigm, Implications for Survey Design, Data Collection and Data Processing Applications, Evaluation and Improvement, and Estimation and Analysis. Each chapter introduces and examines multiple error sources, such as sampling error, measurement error, and nonresponse error, which often offer the greatest risks to data quality, while also encouraging readers not to lose sight of the less commonly studied error sources, such as coverage error, processing error, and specification error. The book also notes the relationships between errors and the ways in which efforts to reduce one type can increase another, resulting in an estimate with larger total error. This book: • Features various error sources, and the complex relationships between them, in 25 high-quality chapters on the most up-to-date research in the field of TSE • Provides comprehensive reviews of the literature on error sources as well as data collection approaches and estimation methods to reduce their effects • Presents examples of recent international events that demonstrate the effects of data error, the importance of survey data quality, and the real-world issues that arise from these errors • Spans the four pillars of the total survey error paradigm (design, data collection, evaluation and analysis) to address key data quality issues in official statistics and survey research Total Survey Error in Practice is a reference for survey researchers and data scientists in research areas that include social science, public opinion, public policy, and business. It can also be used as a textbook or supplementary material for a graduate-level course in survey research methods.

This guide highlights the place of translation in our culture, encouraging awareness of the process of translating and the choices involved, making the translator more 'visible'. Concentrating on major writers and works, it covers translations out of many languages, from Greek to Hungarian, Korean to Turkish. For some works (e.g. Virgil's Aeneid) which have been much translated, the discussion is historical and critical, showing how translation has evolved over the centuries and bringing out the differences between versions. Elsewhere, with less familiar literatures, the Guide examines the extent to which translation has done justice to the range of work available.
