

## Dr Mahas Dento Gulf For Gulf Countries Licensing Examination 1st2014

I am sure the dental graduates preparing for their PG entrance exams will benefit from this book. The authors/editor has taken care to ensure that the information given in this book is accurate and up-to-date. But in every work, there can be human errors and therefore I request the reader to refer to the standard textbooks and other resources in the respective subjects in case of any doubts for clarifications. Let me take this opportunity to thank all the academicians and colleagues who have spent their valuable time towards the success of this book. Without their contribution, this work would not have materialized.

The third edition aims to fulfil the long-standing need of the medical students for a concise textbook of community medicine, which makes it an easy and interesting reading, in lucid and simple English. Contributed by 14 eminent teachers, It comprehensively covers all the required topics, explaining the concepts at length and stimulates analytical thinking. The book seeks to encourage students to approach the subject with scientific logic and apply the learned concepts appropriately in the future during his/her professional career.

Reflecting author's experience as a teacher, guide and examiner this book is primarily for the MBBS students to face the practical examination and viva; however, it is also useful for the students pursuing MD/DNB (Community Medicine), MPH, DPH and other relevant disciplines. The book is designed with many figures and tables for easy understanding. Practical part of the book includes spotters with coloured figures, exercises with solutions and clinicosocial case with details of specific cases. Additionally, chapters such as dietary assessment, family study proforma and visits to various centres are included. Viva part includes important sample theory viva questions with answers. This book is provided with online content which includes additional practical and viva questions, answers to practice exercises, links to health programmes and useful websites, and images in community medicine. Topics such as OSCE/OSPE, food adulteration and tips for PowerPoint presentation are also included in the online content.

### **Sports Rehabilitation and Injury Prevention**

Essential Clinical Oral Biology is an accessible guide to oral biology, introducing the scientific knowledge necessary to succeed in clinical practice. Student-friendly layout with clinical photographs throughout Each chapter has clearly defined key topics and learning objectives Covers the essentials: what you need to know and why Companion website featuring interactive MCQs, teaching presentations and downloadable images

This text provides a comprehensive, practical, evidence-based guide to the field. It covers each stage of the rehabilitation process from initial assessment, diagnosis and treatment, to return to pre-injury fitness and injury prevention. Presenting a holistic approach, this text also addresses the nutritional and psychological aspects of the rehabilitation process for the amateur sports enthusiast as well as elite athletes. Divided into five parts, Parts I, II and III cover screening and assessment, the pathophysiology of sports injuries and healing and the various stages of training during the rehabilitation process. Part IV covers effective clinical decision making, and Part V covers joint specific injuries and pathologies in the shoulder, elbow wrist and hand, groin and knee. Key features: Comprehensive. Covers the complete process from diagnosis and treatment to rehabilitation and prevention of injuries. Practical and relevant. Explores numerous real world case studies and sample rehabilitation programmes to show how to apply the theory in practice. Cutting Edge. Presents the latest research findings in each area to provide an authoritative guide to the field.

Chapters are introduced with a non-formal statement that sets the tone for developing the core idea. They are then structured into subtopics and are further divided into small and discrete sections to which the reader's attention is sought. Concise, high-yield subject matter is provided in boxes, to enhance the study experience of the students. Flow charts give easy understanding of evaluation and management protocols in a student-friendly manner. The practicing obstetrician-gynecologist should be equipped today with a far richer armamentarium than ever before. This is in part due to sheer exp.

### **Topic Wise PLAB Part-1 MCQs**

**This book is in question-answer format in 2 volumes. Volume I covers the syllabus of Paper I, while Volume II will deal with the syllabus of Paper II.**

**This book focuses on the basic aspects of dental stem cells (DSCs) as well as their clinical applications in tissue engineering and regenerative medicine. It opens with a discussion of**

classification, protocols, and properties of DSCs and proceeds to explore DSCs within the contexts of cryopreservation; epigenetics; pulp, periodontal, tooth, bone, and corneal stroma regeneration; neuronal properties, mesenchymal stem cells and biomaterials; and as sources of hepatocytes for liver disease treatment. The fifteen expertly authored chapters comprehensively examine possible applications of DSCs and provide invaluable insights into mechanisms of growth and differentiation. **Dental Stem Cells: Regenerative Potential** draws from a wealth of international perspectives and is an essential addition to the developing literature on dental stem cells. This installment of Springer's Stem Cell Biology and Regenerative Medicine series is indispensable for biomedical researchers interested in bioengineering, dentistry, tissue engineering, regenerative medicine, cell biology and oncology.

**This book provides clinicians with state of the art information on the use of zygomatic implants to restore function and improve quality of life. International experts come together to showcase important innovations and advances in techniques that will assist in the optimization of outcomes. Readers will find information on indications, biomechanics, the role of imaging, digital treatment planning, and all aspects of implant placement. Individual chapters are devoted to different procedures, including the extramaxillary surgical technique, extended sinus lift with retained bone window, the anatomy-guided approach, the quad zygoma technique, and static and dynamic guided surgery. The use of zygomatic implants specifically in oncology patients is also given detailed consideration. Today, the zygomatic approach offers many advantages for patients with severe maxillary resorption, in whom grafting was in the past unavoidable. In providing an up-to-date global perspective on the zygoma concept, this book will be an invaluable source of guidance for practitioners at all levels of experience. This book provides an integrated multidisciplinary index of clinical conditions and presentations, guidelines for clinical problem-solving, and covers legal, ethical and organisational aspects of clinical medicine. It is an essential aid for the medical graduate. -- Cover.**

*This preparatory manual is a single source reference for postgraduate exam preparation. Intense efforts have gone in preparation of the book to make it complete in all aspects. In-depth coverage of every subject in the form of synopsis is the highlight of the book. To enhance rapid reading, quick learning facts have been framed as an effective learning tool. Multiple-choice questions have been designed to suit both national and international competitive postgraduate entrance examinations.*

*The forerunner to this book - Ryder, Mir & Freeman's 'An Aid to the MRCP Short Cases' - rapidly established itself as a classic and has sold over 30,000 copies. The new Progressive Assessment of Clinical Examination Skills (PACES) has replaced the old short case exam and, as a result, the authors have revised, reworked and extended their highly successful text so that it continues to address the study needs of candidates. This new revision aid is now presented in two volumes: An Aid to the MRCP PACES Volume 1: Stations 1, 3 and 5 An Aid to the MRCP PACES Volume 2: Stations 2 and 4 This Volume covers Station 1 'Respiratory and Abdominal Systems', Station 3 'Cardiovascular and Neurological Systems' and Station 5 'Skin, Locomoter, Eyes and the Endocrine System'. The 200 cases have been written in accordance with the new examining and marking schemes used for the exam. They provide an invaluable training and revision aid for all candidates.*
