Rock Climbing: The AMGA Single Pitch Manual is intended to serve as a textbook for past and future participants of the AMGA SPI program. The book more specifically address the needs of the professional cilmbing instructor and advanced recreational climbers. It presents the most current, internationally recognized standards for technical climbing systems used in single pitch rock terrain. Included are chapters on effective teaching in the outdoor environment, risk management, professionalism, environmental awareness, and

This book offers a comprehensive and timely overview of internal combustion engines for use in marine environments. It reviews the development of modern four-stroke marine engines, gas and gas-diesel engines and low-speed two-stroke crosshead engines, describing their application areas and providing readers with a useful snapshot of their technical features, e.g. their dimensions, weights, cylinder arrangements, cylinder capabilities, rotation speeds, and exhaust gas temperatures. For each

marine engine, information is provided on the manufacturer, historical background, development and technical characteristics of the manufacturer's most popular models, and detailed drawings of the engine, depicting its main design features. This book offers a unique, self-contained reference guide for engineers and professionals involved in shipbuilding. At the same time, it is intended to support students at maritime academies and university students in naval architecture/marine

handy guide gives detailed images of the various measuring methods used in practice, such as goniometric measurement of all the main joints; lower and upper limb girth measurements; manual muscle testing of all major muscle groups; spinal measurements; spirometry (respiratory function); and many more! Each illustration is accompanied by concise but clear instructional text. Additionally, reference tables cover the aims, methodology and results of research, summarising studies on the reliability and validity of a particular measuring tool. Highly
