Develop the Skills to Learn Anything Faster, Easier, and More Effectively Written by the creators of the #1 bestselling course of the same name, this book will teach you how to "hack" your learning, reading, and memory skills, empowering you to learn everything faster and more effectively. **What Would You Do If You Could Learn Anything 3 Times Faster?** In our rapidly changing and information-driven society, the ability to learn quickly is the single most important skill. Whether you're a student, a professional, or simply embarking on a new hobby, you are forced to grapple with an every-increasing amount of information and knowledge. We've all experienced the frustration of an ever-growing reading list, struggling to learn a new language, or forgetting things you learned in even your favorite subjects. **This Book Will Teach You 3 Major Skills:** Speed reading with high (80%+) comprehension and understanding Memory techniques for storing and recalling vast amounts of information quickly and accurately Developing the cognitive infrastructure to support this flood of new information long-term However, the SuperLearning skills you'll learn in this course are applicable to many aspects of your every day life, from remembering phone numbers to acquiring new skills or even speaking new languages. **Anyone Can Develop Super-Learning Skills** This course is about improving your ability to learn new skills or information quickly and effectively. We go far beyond the kinds of "speed reading" (or glorified skimming) you may have been exposed to, diving into the actual cognitive and neurological factors that make learning easier and more successful. We also give you advanced memory techniques to grapple with the huge loads of information you'll soon be able to process. "This book should be the go-to reference for anyone looking to upgrade their mind's firmware!" -Benny Lewis, Language Learning Expert **Learn How to Absorb and Retain Information in a Whole New Way - A Faster, Better Way** The Authors' Proprietary Method for Teaching Speed Reading & Memory Improvement You may have even taken a normal speed reading course in the past, only to realize that you didn't retain anything you read. The sad irony is that in order to properly learn things like speed reading skills and memory techniques in the past, you had to read dozens of books and psychological journals to decode the science behind it. Or, you had to hire an expensive private tutor who specializes in SuperLearning. That's what I did. And it changed my life. Fortunately, my co-authors (experts and innovators in the fields of superlearning, memory improvement, and speed reading) agreed to help me transform their materials into the first ever digital course. Over 25,000 satisfied students later, we have transformed our course into a book you can enjoy anywhere. Our teaching methodology relies heavily on at-home exercises. The chapters themselves are only part of what you're buying. You will be practicing various exercises and assignments on a regular basis over the course a 7 week schedule. In addition to the lectures, there are hours of supplemental video and articles which are considered part of the curriculum. "This vital book contains all the tools needed to learn, memorize, and reproduce anything you want with the joy that ease brings. Don't take another class until you've read it!" -Dr. Anthony Metivier, Author & Memory Expert If you wish to improve memory and concentration, learn more effectively, read faster, and learn the techniques of memory champions - look no further! An awesome read that will push the limits of your brain. Levi does an incredible job of guiding you through, to bring your brain from average to UNSTOPPABLE!" -Nelson Dellis, 4-Time USA Memory Champion

Discover how easy memory improvement can be and all the rewards that come from remembering better! Get better grades, impress teachers, friends and family, and learn skills that will make school easier and more fun. **Unlock Your Amazing Memory** teaches a complete process for remembering. It's packed start to finish with real-world examples that can be applied to any fact or subject. The book demystifies the process of remembering while still being easy to read, with over 150 pictures and illustrations. Readers start at the beginning, learning about the three distinct steps to remembering and discovering where they need the most help. Solutions are provided for each of the three areas: practical tools to address each step. This is not a book that teaches cute tricks to remember a few specific facts. It's filled with tools and techniques anyone can use to remember anything, including: - numbers - dates and events in history - spelling and vocabulary - foreign languages - lists and

the steps to any process (great for math and science) - groups of facts about specific events or subjects - math formulas - state and world capitals - and much more
The helpful tools are perfect for any student who: - wants to get better grades - is forgetful or absentminded - lacks motivation or dislikes one or more subjects - wants to manage stress and improve test taking abilities - is a good student who wants to move to the next level - is struggling or bored in school You can remember better, and Unlock Your Amazing Memory is the easy way to learn! Unlock Your Amazing Memory is based on the author's school program called "The Feats of Memory Show." A teacher recently wrote this about the assembly show: "I have been teaching for 15 years and can honestly say that after watching his show I became more motivated and instantly incorporated some of his techniques into my everyday teaching. Students have responded in a positive manner and have changed the way they are going about remembering facts. I have seen an improvement in their ability to retain information on a daily basis." (Jon S, Setauket, New York) Brad Zupp is a professional speaker, entertainer and memory coach. His interest in memory improvement dates back to his childhood, trying to find better ways to remember information in school. In his 20s, Brad became fascinated with techniques that would allow an ordinary person to memorize a shuffled deck of playing cards, long numbers, or even an entire magazine. He learned the techniques and applied them to learning to speak a foreign language. Several years later, he threw himself into learning more about the mind and memory, and soon after started attending memory competitions all over the world. He has won several bronze medals in the USA Memory Championship. In 2012 Brad competed in the World Memory Championship in London, memorizing nine decks of shuffled playing cards perfectly in one hour. Brad continues to improve his memory daily, memorizing decks of playing cards, numbers, names and faces, poetry, and more, but is most passionate about helping others learn how to remember better. He speaks frequently on the subject of memory improvement for students in grades 3 through 8, as well as for senior citizens, baby boomers, salespeople and executives.

Tomorrow's Professor

The potential of the human memory is phenomenal. But do you know how to make the most of yours? In this edition of the BBC classic Use Your Memory, the secrets of how to improve your memory are fascinatingly revealed by Tony Buzan. He teaches you how to improve your memory for names, numbers, dates and lists and also for speeches, articles, poetry and whole books. There are sections for card players, for people learning new languages and for those studying for exams, as well as an intriguing chapter on how to recall your dreams. Use Your Memory will be particularly useful for school and university students throughout their studies, and especially during review and exam times. Be useful for business people and for those wishing to improve their brainpower as they advance in years. Allow anyone to join the rapidly growing number of mental athletes who are preparing themselves for memory competitions and championships. All the classic memory systems are explained, plus, of course, Tony Buzan's own world-famous Mind Mapping technique.

Kings and queens, British prime ministers, American presidents, countries of Europe... We should all know these things - but like me, you're probably resigned to being the kind of person that just never will. Now Grandmaster of Memory Ed Cooke offers up his memory secrets with a fun, quick and completely unforgettable way to remember the things you thought you never could. But this is no boring Willy, Willy, Harry, Ste. With Ed leading the way on unlikely adventures through people and places, Abraham Lincoln may become a circle of bra-wearing hams linking arms in your mind, and you may well encounter a fridge wearing Calvin Klein underpants. You could also soon find yourself rattling off the prime ministers to a rapt audience and adding, in a knowing tone, 'ah yes, Marquess of Rockingham, Whig I believe?'. What is for sure is that you'll be bursting with knowledge that will stick in your mind and impress your friends for ever. A surprisingly simple way for students to master any subject--based on one of the world's most popular online courses and the bestselling book *A Mind for Numbers* *A Mind for Numbers* and its wildly popular online companion course "Learning How to Learn" have empowered more than two million learners of all ages from around the world to master subjects that they once struggled with. Fans often wish they'd discovered these learning strategies earlier and ask how they can help their kids master these skills as well. Now in this new book for kids and teens, the authors reveal how to make the most of time spent studying. We all have the tools to learn what might not seem to come naturally to us at first--the secret is to understand how the brain works so we can unlock its power. This book explains:

- Why sometimes letting your mind wander is an important part of the learning process
- How to avoid "rut think" in order to think outside the box
- Why having a poor memory can be a good thing
- The value of metaphors in developing understanding
- A simple, yet powerful, way to stop procrastinating

Filled with illustrations, application questions, and exercises, this book makes learning easy and fun.

This unique and brilliant book is a history of human knowledge. Before the invention of printing, a trained memory was of vital importance. Based on a technique of impressing 'places' and 'images' on the mind, the ancient Greeks created an elaborate memory system which in turn was inherited by the Romans and passed into the European tradition, to be revived, in occult form, during the Renaissance. Frances Yates sheds light on Dante's Divine Comedy, the form of the Shakespearian theatre and the history of ancient architecture; The Art of Memory is an invaluable contribution to aesthetics and psychology, and to the history of philosophy, of science and of literature.

Having achieved the seemingly unachievable, becoming a U.S. Memory Champion, Foer shows how anyone with enough training and determination can achieve mastery of the art of memory. Improve your memory, sharpen your mind, and change your life—at any age! As we age, our memories become unreliable; we misplace things and forget details. In Ultimate Memory Magic, Karol shows that these side effects of aging are not inevitable. His memory-boosting system, called "Cogmental Intelligence," goes beyond preserving mental acuity and acts to improve cognitive function through lifestyle changes and mental exercises. Concentration, alertness, and focus can all be strengthened—by anyone, at any age. Karol's cutting-edge program will help you sharpen their thinking and regain their mental edge - Live healthier, mentally and physically - Clear away negativity and stress - Become more creative and innovative A former steel mill worker, Karol used this method to transform his own life. Now he is physically healthy and renowned for his unparalleled memory. His incredible feats of memory and mentalism have been featured on The Tonight Show, The Ellen Show, Today, and more. Karol has used his Cogmental Intelligence method with clients from professional athletes to business leaders and speaks at venues like the Pentagon. With a foreword from bestselling author and physician Daniel G. Amen, Ultimate Memory Magic will allow readers of any age to hone their minds, strengthen their memories, and improve their lives.

NATIONAL BESTSELLER • For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. “ A brilliant and thoroughly modern guide to learning new languages. ” —Gary Marcus, cognitive psychologist and author of the New York Times bestseller *Gitars Zero* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn ’ t learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he ’ s discovered. Starting with pronunciation, you ’ ll learn how to rewire your ears and turn foreign sounds into familiar sounds. You ’ ll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you ’ ll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you ’ ll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.

Can we really memorize anything? The answer is, ‘ Yes we can! ’ From Guinness World Record holders (for conducting the largest maths class on memorizing times tables till 99) Aditi Singhal and Sudhir Singhal comes a book that will serve as a manual to explore the immense power of your memory through a scientific yet simple approach. It will: • Explain concepts with simple illustrations • While teaching you memory techniques, it will also discuss their application in real life, like memorizing appointments, presentations, names and faces, long answers, spellings, formulae, vocabulary, foreign languages and general information • Give the scientific interpretation of ancient memory-enhancing practices that will be particularly useful for students, teachers, professors, doctors, managers, marketing and other professionals as well as the common man Following the unparalleled success of *How to Become a Human Calculator*, Aditi Singhal and Sudhir Singhal turn their hands to helping you master the right method to input any information using which you can easily memorize anything and, more important, recall it whenever required.

One of the world's great mathematicians shows why math is the ultimate timesaver—and how everyone can make their lives easier with a few simple shortcuts. We are often told that the key to success is hard work. But success isn't about hard work – it's about shortcuts. Shortcuts allow us to solve one problem quickly so that we can tackle an even bigger one. They make life so much easier. And according to Marcus du Sautoy, math is the very art of the shortcut. Thinking Better is a celebration of how math lets us do more with less. Du Sautoy explains how he revolutionized therapy, why calculus is the greatest shortcut ever invented, whether you must really practice for ten thousand hours to become a concert violinist, and why math has an advantage over even the most powerful AI. Throughout, we meet artists, scientists, and entrepreneurs who use mathematical shortcuts to change the world. Delightful, illustrated, and practical, Thinking Better is for anyone who has wondered why you should waste time climbing the mountain when you could go around it much faster.

Tony Buzan invented the Mind Map technique five decades ago. Seeing the transformational impact it had on people, he has been spreading the thinking tool across the world ever since. Tony Buzan's Mind Map technique has gathered amazing praise and an enormous worldwide following over the last few decades, but as with any very successful idea, there have been many sub-standard imitators. With Mind Map Mastery, Tony Buzan re-establishes the essential concepts that are the core of the Mind Map with a clarity and practicality unrivalled by other books. If you are looking to improve your memory, plan your business strategy, become more organized, study for an exam or plan out your future, this is the book for you. With a clarity and depth that far exceeds any other book on the subject, it includes the history of the development of the Mind Map, an explanation of what makes a Mind Map (and what isn't a Mind Map) and why it's such a powerful tool, illustrated step-by-step techniques for Mind Map development _ from simple to complex applications _ and how to deal with Mind Maps that have _gone wrongî. Developed both for those new to the Mind Map concept as well as more experienced users who would like to revise and expand their expertise, Mind Map Mastery is the one Mind Mapping book needed on the shelf of every student and business person across the world.

With half a million copies in print, How to Read a Book is the best and most successful guide to reading comprehension for the general reader, completely rewritten and updated with new material. A CNN Book of the Week: "Explains not just why we should read books, but how we should read them. It's masterfully done." –Farheed Zakaria Originally published in 1940, this book is a rare phenomenon, a living classic that introduces and elucidates the various levels of reading and how to achieve them—from elementary reading, through systematic skimming and inspectional reading, to speed reading. Readers will learn when and how to "judge a book by its cover," and also how to X-ray it, read critically, and extract the author's message from the text. Also included is instruction in the different techniques that work best for reading particular genres, such as practical books, imaginative literature, plays, poetry, history, science and mathematics, philosophy and social science works. Finally, the authors offer a recommended reading list and supply reading tests you can use measure your own progress in reading skills, comprehension, and speed.

This is THE book on how to memorize names and faces. It's the only name memory book written by a 2 time USA Memory Champion. Using these techniques Ron White has memorized 128 names in 15 minutes at the 2011 USA Memory Championship. What if you could just learn 128 new names this year? You can. What would it do for your friendships and business if you developed a great memory for names and faces? This is the ONLY memory book that has images for 1600 world wide names! No other book offers that. This will save you MONTHS off your learning curve. In this book you will learn: The 5 step simple process to remember names and faces This is stopping your memory from working and how to fix it in seconds How to focus your brain instantly How I memorized a room full of names on National Geographic show Brain Games Meet 30 people in 30 minutes and recall all their names I promise you this book will eliminate you being from embarrassed by not remembering names! This is the only book on how to remember names written by a 2 time USA Memory Champion! What is the hardest part of remembering names? It's turning the names into pictures. This is the only book on name memory with 1600 names turned into pictures for YOU!! This book will save you months or work in developing pictures for names. Get better at remembering names faster with these 1600 images than any other book This is the only book you will ever need for remembering names and faces. Q & A with Ron White Q: Can anyone improve their memory? A: Yes, I have taught these techniques to a 6 year old and watched her memorize the names of the 44 presidents of the USA literally in just 90 minutes. I have also taught a World War II veteran and he was the star of the class. Some people will learn the techniques and become memory champions. Others will just get better at remembering names Q: How long does it take to get good at remembering names? A: It depends but what takes the longest is turning names into pictures and getting pictures in your head for common names. It could take a year to turn 500 names into a picture. But this book does that work for you turning 1600 names into pictures Q: What is it like to compete in the USA Memory Championship and World Memory Championship? A: It is a TON of fun. I wish more people would start doing these tournaments. They are such incredible fun and the people you meet who are pushing their memories are just incredible. Q: When did you realize you had this special ability? A: I don't have a special ability. Anyone can learn this system. I'm a normal guy who learned a system Q: What is the most names you have memorized? A: 128 names in 15 minutes at the USA Memory Championships. As a veteran of the military and war in Afghanistan I also memorized all the fallen heroes from the us military. It is over 2,300 names and took me about 10 months. Q: How many names could the average person remember? A: How about this: Set a goal for yourself to meet and remember 100 new names this year. Sounds like a lot but it is only 2 a week but just imagine how knowing 100 new people would change your relationships. If I can do 128 names in 15 minutes you can do 100 in 12 months. Oh, for the record you can do 128 in 15 minutes too but you don't believe me now. Get the book and then you will believe me.

Becoming a more effective learner and boosting your productivity will help you earn better grades - but it'll also cut down on your study time. This is a short, meaty book that will guide you through ten steps to achieving those goals: Pay better attention in class, Take more effective notes, Get more out of your textbooks, Plan like a general, Build a better study environment, Fight entropy and stay organized, Defeat Procrastination, Study smarter, Write better papers, Make group projects suck less, Whether you're in college or high school, this book will probably help you. But not if you're a raccoon. I want to be very clear about that; if you're a raccoon, please buy a different book. This one will do absolutely nothing for you. How did you even learn to read, anyway?

This book consists of two titles, which are the following: Book 1: Do you want to learn more and faster? Would you like to have a better memory? Then look no further! In this guide, you will be given several answers as to how to do those things. For example, we will cover the importance of memorizing things to boost your brain's capacity for retaining information. You will also learn about the importance of learning another language, which stimulates brain activity and creativity more than people realize. On top of that, many questions will be answered regarding teaching children another language or raising them in a bilingual home. Book 2: Many people underestimate the value of awareness and consciousness when it comes to learning. Keeping information in that big brain of yours can be challenging if you don't apply the right methods to do so. For you to learn how to learn, or to remember what you have observed, it's mandatory that you trigger your senses to retain information faster and more efficiently. This can be done by understanding the topics in this book, which include using the said awareness to take in information at a faster pace, and using visual means to support you. Do you use flashcards, computer games, or other studying techniques? These will all be addressed.
