risks from musculoskeletal disorders faced by cleaners at work and explains how to assess them and prevent them from occurring. It contains case studies giving effective solutions to these problems, where risks of manual handling injuries have been reduced in practice. In addition to the case studies, there are a large number of useful ideas drawn from across the industry, many coming directly from cleaners. The target audience consists of all those involved in the management of health and safety in the cleaning industry, including employers, managers/supervisors, contract organisations, health and safety personnel trainers, safety and union
