For more than 20 years, Network World has been the premier provider of information, intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations. Readers are responsible for designing, implementing and managing the voice, data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce.
Socially Responsible IT Management shows IT professionals how to overcome the social crisis that has resulted from the wide-spread use of information technology. By responsibly managing security threats, protecting individual privacy, reducing hazardous waste, and minimizing other negative effects on IT staff and computer users, as well as ordinary citizens around the world, IT professionals can benefit the society at large and reap rewards for their own organizations as well. Scandals at Enron, Andersen, Sotheby's and Christie's, Merrill Lynch, and Tyco are fueling a crisis of confidence in business. Regulators, voters, investors, customers, and employees are demanding that businesses be more socially responsible. Rhetoric is not enough, all organizations need to demonstrate that they are living up to social expectations. Erbschloe shows managers how to take charge of key aspects of their IT operations and follow a morally, ethically, and legally correct path to success. · Supported by author speaking tour and "Computer Economics" website, www.computereconomics.com · Step-by-step instructions on how to accomplish objectives of privacy and security · Explains principles of ergonomics, energy efficiency, and recycling that can bring return on investment

What Sells for what (in Every Category!)
Michael Ströbel worked for several years as a software engineer and consultant in the German IT industry before joining IBM Research in Switzerland, where he developed his interest in support for negotiations in electronic markets. During his career in research, he has published several articles on this topic in major international conferences and journals and received a PhD from the University of St.Gallen, Switzerland. Based on his experiences and contributions, the author discusses electronic negotiation technologies - key ingredients for the next generation of electronic markets - from a scientific as well as a practitioner's perspective. He reviews the state-of-the-art and then introduces novel support mechanisms and design elements, which are applied in a number of case studies. This book is geared towards technicians interested in E-Commerce application development but also offers extensive background reading for educational purposes.
