'How can a man become a god?' So enquired Alexander the Great of the Brahmin sages of India. And how did they reply? 'By doing what it is impossible for a man to do.' And that answer set a keynote for the Conqueror's entire career, which was characterized throughout by Alexander's attempts to achieve the unachievable: to scale the fresh heights and make the incredible real and tangible on earth. He wrestled an Indian monster larger than an elephant, fought ants the size of foxes and contested bats with human teeth. He became a Jewish convert, sailed up the Ganges and visited the Earthly Paradise. Already a legend in his own lifetime, the glittering figure of Alexander preoccupied European, Jewish and Arabic folklore until the 15th century. Richard Stoneman, who is one of his leading modern interpreters, here presents a range of Greek and Latin texts which recount the Conqueror's adventures in the east. Essential reading for students of late antique and medieval literature, these stories are still unsurpassed for sheer entertainment, opening a window onto a rumbustious world of legend as rich as that of the Arabian Nights. This revised edition offers a substantial new introduction by the editor.

Nine gods ruled the world, until the ultimate betrayal resulted in their destruction. Now, the world is dying and only by restoring the Lost Gods can it be saved. In the land of Pozhar, the people fear the return of Zhar Ptitsa, the god of souls and rebirth who nearly destroyed them nine hundred years ago in a terrible rage. To prevent his rebirth, the people hunt down and sacrifice Vessels, those born with a piece of Zhar Ptitsa's soul within them. The Sacred Texts say that one thousand such Vessels will be born and all must be sacrificed to destroy Zhar Ptitsa once and for all. Now, only two pieces remain in the bodies of two thieves who will not go to the Flames without a fight.

Nine gods ruled the world, until the ultimate betrayal resulted in their destruction. Now, the world is dying and only by restoring the Lost Gods can it be saved. In the island nation of Kundou, a prince condemned to a dark fate is determined to use it to set free the power his family has long kept enslaved. The fiery kingdom of Pozhar has worked for centuries to forever destroy the god who once tried to kill them, but others are determined to see the last remaining pieces never reach the sacrificial altar for much more dangerous reasons... In Piedre, zealous cults are determined to either kill or abuse the notorious Basilisk Prince, mortal reincarnation of the lost god of death... Verde, the only country to still love their gods,

These fourteen essays address controversies over a variety of cultural properties, exploring them from perspectives of law, archeology, physical anthropology, ethnobiology, ethnomusicology, history, and cultural and literary study. The book divides cultural property into three types: Tangible, unique property like the Parthenon marbles; intangible property such as folktales, music, and folk remedies; and communal "representations," which have lead groups to censor both outsiders and insiders as cultural traitors.

This latest volume in the Culture & Civilization series gathers interdisciplinary voices to present a collection of essays on travel and travel narratives. The essays span a range of topics from iconic ancient travel stories to modern tourism. They discuss travel in the ancient world, modern heroic travels, the literary culture of missionary travel, the intersection of fiction and travel narratives, modern literary traditions and visions of Greece, personal identity, and expatriation. Essays also address travel memoirs, the re-imagining of worlds through travel, transformed landscapes and animals in travel narratives, diplomacy, English women travel writers, and pilgrimage and health in the medieval world. The history of travel writing takes in multiple pursuits: exploration and conquest, religious pilgrimage and missionary work, educational tourism and diplomacy, scientific and personal discovery, and natural

history and oral history. As a literary genre, it has enhanced a wide range of disciplines, including geography, ethnography, anthropology, and linguistics. Moreover, twenty-first-century interests in travel and travel writing have produced a global framework that promises to expand travel's theoretical reach into the depths of the Internet, thus challenging our conventional concept of what it means to travel. The fact that travel and travel writing have a prehistory that is embedded in foundational religious texts and ancient narratives of journey, like the Odyssey and the Epic of Gilgamesh, makes both travel and travel writing fundamental and essential expressions of humanity. Travel encourages writing, particularly as epistolary and poetic chronicling. This is clearly a history and tradition that began with human communication and which has kept pace with our collective development.

A uniquely British phenomenon, the 30 or so figures cut into the turf of southern England have excited antiquarians, archaeologists, and the general public for generations. However, their origins are enigmatic. Paul Newman shows how hill-figures reveal Britain's darkest past: Druid massacres, conjectured human sacrifice, and strange phallic and pagan rites that in milder form survive even today. In recent years much has changed in the world of hill-figure studies, most significantly perhaps the absolute dating by scientific means of early silts incorporated into the Uffington White Horse, which can now be seen to date from around 1000 BC. These and other discoveries and reinterpretations are among the many features which make this book essential reading for all those who have been captivated by the potent symbolism of chalk hill-figures.

The German Genius

Two old gods play chess to decide the fate of the galaxy. A hapless pawn is cast down upon the Earth. Mikha'il awakens, mortally wounded, on his crashed ship. He's saved by a young woman with unusual abilities. With no memory of his past and his ship destroyed, he has no choice but to integrate into her village. In stone-aged Mesopotamia, everyone must work or starve, but the only skill he possesses is an uncanny ability to kill. Ninsianna's people have prophecies of a time when a winged champion, a Sword of the Gods, will defend their people against an Evil One. Mikha'il insists he's no demi-god, but the dark premonitions sent to her by She-who-is say otherwise! Unbeknownst to them, Earth is about to become ground zero in a war between two ancient adversaries. The Emperors' armies are a dying race ... and humans hold the key to their survival. As love blossoms, the mysterious kidnappings of young women forces Mikha'il to choose between Ninsianna and his duty to complete a mission he can't quite recall. As fault lines open in the heavens, Mikha'il must teach his adopted people to raise armies from the dust to fight back against

an enemy who remains unseen.

Traversing visible and invisible realms, *A Time of Lost Gods* attends to profound rereadings of politics, religion, and madness in the cosmic accounts of spirit mediumship. Drawing on research across a temple, a psychiatric unit, and the home altars of spirit mediums in a rural county of China's Central Plain, it asks: What ghostly forms emerge after the death of Mao and the so-called end of history? The story of religion in China since the market reforms of the late 1970s is often told through its destruction under Mao and relative flourishing thereafter. Here, those who engage in mediumship offer a different history of the present. They approach Mao's reign not simply as an earthly secular rule, but an exceptional interval of divine sovereignty, after which the cosmos collapsed into chaos. Caught between a fading era and an ever-receding horizon, those "left behind" by labor outmigration refigure the evacuated hometown as an ethical-spiritual center to come, amidst a proliferation of madness-inducing spirits. Following pronouncements of China's rise, and in the wake of what Chinese intellectuals termed semicolonialism, the stories here tell of spirit mediums, patients, and psychiatrists caught in a shared dilemma, in a time when gods have lost their way.

This volume contains the most significant pieces of unpublished writing completed by Eric Voegelin during an important time of his career. Spanning the period from the early 1960s to the late 1970s, these selections supplement the body of work Voegelin published after the appearance of the first three volumes of *Order and History* in 1956 and 1957. The five texts included here are "What Is History?" "Anxiety and Reason," "The Eclipse of Reality," "The Moving Soul," and "The Beginning and the Beyond." In their introduction to the volume, Thomas A. Hollweck and Paul Caringella place these writings in their proper context and discuss the ways in which they reveal clues to the evolution of Voegelin's thought. In "What Is History?" Voegelin considers the development of a transcendent structure of history while simultaneously rejecting the notion that history can have a universal meaning. "Anxiety and Reason" focuses on Voegelin's critically important theory of historiogenesis, which links events in pragmatic history with legendary and mythical events leading back to the beginning of the cosmic order. In "The Eclipse of Reality," Voegelin presents a critique of modernity by analyzing the work of Sartre, Schiller, Comte, and others. "The Moving Soul"--a "thought experiment" inspired by a remark Henry Margenau makes in *The Nature of Physical Reality*--attempts to reformulate the connections between physics and myth. The most important of these essays is "The Beginning and the Beyond." Here Voegelin meditates on the universality of experience formed by the tension of existence under God. Publication of these previously unpublished writings will enable scholars to trace the genesis of many of the concerns that occupied Voegelin during a period in which the conception of his main work was undergoing frequent and perhaps fundamental changes.

In unearthing biblical cities, archaeology transformed nineteenth-century thinking on the truth of Christianity and its role in modern cities.

A history of the creation of museums in Ottoman Turkey, which demonstrates that museum-building was both a product of and a response to European imperialism. Having learned to value their antiquities, the Ottomans proceeded to use them as visual manifestations of emerging nationalism.

Hagia Sophia, the Church of Holy Wisdom, sits majestically atop the plateau that commands the straits separating Europe and Asia. Located near the acropolis of the ancient city of Byzantium, this unparalleled structure has enjoyed an extensive and colorful history, as it has successively been transformed into a cathedral, mosque, monument, and museum. In Hagia Sophia, 1850-1950, Robert S. Nelson explores its many lives. Built from 532 to 537 as the Cathedral of Constantinople, Hagia Sophia was little studied and seldom recognized as a great monument of world art until the nineteenth century, and Nelson examines the causes and consequences of the building's newly elevated status during that time. He chronicles the grand dome's modern history through a vibrant cast of characters—emperors, sultans, critics, poets, archaeologists, architects, philanthropists, and religious congregations—some of whom spent years studying it, others never visiting the building. But as Nelson shows, they all had a hand in the recreation of Hagia Sophia as a modern architectural icon. By many means and for its own purposes, the West has conceptually transformed Hagia Sophia into the international symbol that it is today. While other books have covered the architectural history of the structure, this is the first study to address its status as a modern monument. With his narrative of the building's rebirth, Nelson captures its importance for the diverse communities that shape and find meaning in Hagia Sophia. His book will resonate with cultural, architectural, and art historians as well as with those seeking to acquaint themselves with the modern life of an inspired and inspiring building.

The Lost Gods of England

Sword of the Gods: The Chosen One

Tells the story of Bavaria's acquisition of ancient Greek sculptures that rivaled those acquired by England from the Parthenon. The controversial removal of the Parthenon sculptures from Greece to England in the first decade of the nineteenth century by Thomas Bruce, seventh Earl of Elgin, sparked an international competition for classical antiquities. This volume tells a lesser-known chapter of that story, concerning sculptures from the Temple of Aphaia on the Greek island of Aegina. Discovered in 1811 as the Parthenon project was nearing its completion, these ancient sculptures were acquired at auction by Johann Martin Wagner

(1777–1858) on behalf of Crown Prince Ludwig of Bavaria. The sculptures turned out to be significant in a number of ways, offering important evidence for a transitional period of Greek art between the archaic and classical eras, for the existence of an independent Aeginetan school that was the equal of Athenian art at the time, and for Greek sculptures having been elaborately painted and adorned. Originally published in 1817 and presented here for the first time in English, this book reproduces the report commissioned by the crown prince that was written by Wagner and edited by F. W. J. Schelling and contained richly detailed descriptions of the sculptures. In addition, Louis A. Ruprecht Jr. provides a comprehensive historical introduction featuring a constellation of intellectual figures, an afterword, notes, appendices, and more than forty images to tell the fascinating story of the sculptures and their legacy from excavation to the present day.

From the end of the Baroque age and the death of Bach in 1750 to the rise of Hitler in 1933, Germany was transformed from a poor relation among western nations into a dominant intellectual and cultural force more influential than France, Britain, Italy, Holland, and the United States. In the early decades of the 20th century, German artists, writers, philosophers, scientists, and engineers were leading their freshly-unified country to new and undreamed of heights, and by 1933, they had won more Nobel prizes than anyone else and more than the British and Americans combined. But this genius was cut down in its prime with the rise and subsequent fall of Adolf Hitler and his fascist Third Reich—a legacy of evil that has overshadowed the nation's contributions ever since. Yet how did the Germans achieve their pre-eminence beginning in the mid-18th century? In this fascinating cultural history, Peter Watson goes back through time to explore the origins of the German genius, how it flourished and shaped our lives, and, most importantly, to reveal how it continues to shape our world. As he convincingly demonstrates, while we may hold other European cultures in higher esteem, it was German thinking—from Bach to Nietzsche to Freud—that actually shaped modern America and Britain in ways that resonate today.

Italy's Lost Greece reveals the untold story of the modern engagement with Magna Graecia, the region of ancient Greek settlement in South Italy, and provides a unique perspective on the humanist investment in the ancient past, the evolution of modern Hellenism, and the making of the discipline of classical archaeology.

From Homer to Himmler, from Thucydides to Freud, Mycenae has occupied a singular place in the western imagination. Gere takes us from the Cult of the Hero that sprung up in the shadow of the great burned walls in the eighth century BC, to Agamemnon's twentieth-century reincarnation as an Aryan military genius and to the distinctly anti-heroic conclusions of modern archaeology. The Wonders of the World is a series of books that focuses on some of the world's most famous sites or monuments. Their names will be familiar to almost everyone: they have achieved iconic stature and are loaded with a fair amount of mythological baggage. These monuments have been the subject of many books over the centuries, but our aim, through the skill and stature of the writers, is to get something much more enlightening, stimulating, even controversial, than straightforward histories or guides.

Nine gods ruled the world, until the ultimate betrayal resulted in their destruction. Now, the world is dying and only by restoring the Lost Gods can it be saved. Sealed off from the world

for nine hundred years, Schatten is a country of darkness and mystery. The power of Teufel, Shadow of the Lost Licht, keeps the rest of the world out, and his deadly Sentinels keep the people of Schatten in. Their only hope for salvation lies in a single line of ancient prophecy. Sasha wakes up with no memory of where he is, how he got there-or who he is. All he remembers is his name, and falling to a terrible beast with burning violet eyes. All he possesses are the clothes he wears, the weapons he carries, and a strange ring. All he can do is venture deeper into the land of snow and ice in which he is lost, hoping that eventually he will find answers.

THE FIRST DAUGHTER IS FOR THE THRONE THE SECOND DAUGHTER IS

FOR THE WOLF Red and the Wolf have finally contained the threat of the Old Kings but at a steep cost. Red's beloved sister Neve, the First Daughter is lost in the Shadowlands, an inverted kingdom where the vicious gods of legend have been trapped for centuries and the Old Kings have slowly been gaining control. But Neve has an ally though it's one she'd rather never have to speak to again the rogue king Solmir. Solmir wants to bring an end to the Shadowlands and he believes helping Neve may be the key to its destruction. But to do that, they will both have to journey across a dangerous landscape in order to find a magic mirror and the mysterious Heart Tree, and finally to claim the gods' dark, twisted powers for themselves. In Lost Gods, Brom, the artist and author of The Child Thief and Krampus, brings readers into a dark, fantastical, masterful mix of brilliant illustrations and dazzling prose. A young man descends into Purgatory to save his wife and unborn child in this gorgeous, illustrated tale of wonder and terror from the mind of master storyteller and acclaimed artist Brom. Fresh out of jail and eager to start a new life, Chet Moran and his pregnant wife, Trish, leave town to begin again. But an ancient evil is looming, and what seems like a safe haven may not be all it appears . . . Snared and murdered by a vile, arcane horror, Chet quickly learns that pain and death are not unique to the living. Now the lives and very souls of his wife and unborn child are at stake. To save them, he must journey into the bowels of purgatory in search of a sacred key promised to restore the natural order of life and death. Alone, confused, and damned, Chet steels himself against the unfathomable terrors awaiting him as he descends into death's

stygian blackness. With *Lost Gods*, Brom's gritty and visceral writing takes us on a haunting, harrowing journey into the depths of the underworld. Thrust into a realm of madness and chaos, where ancient gods and demons battle over the dead, and where cabals of souls conspire to overthrow their masters, Chet plays a dangerous game, risking eternal damnation to save his family.

With 1,125 entries and 170 contributors, this is the first encyclopedia on the history of classical archaeology. It focuses on Greek and Roman material, but also covers the prehistoric and semi-historical cultures of the Bronze Age Aegean, the Etruscans, and manifestations of Greek and Roman culture in Europe and Asia Minor. The *Encyclopedia of the History of Classical Archaeology* includes entries on individuals whose activities influenced the knowledge of sites and monuments in their own time; articles on famous monuments and sites as seen, changed, and interpreted through time; and entries on major works of art excavated from the Renaissance to the present day as well as works known in the Middle Ages. As the definitive source on a comparatively new discipline - the history of archaeology - these finely illustrated volumes will be useful to students and scholars in archaeology, the classics, history, topography, and art and architectural history.
