Health Maintenance and Principal Microbial Diseases of Cultured Fishes

Lassen National Forest (N.F.), Motorized Travel Management

A Report to the President of the United States

Fully revised and updated, this book is a valuable resource for professionals and students in the areas of aquaculture, aquatic health maintenance, pathology, and aquatic farm management.

Snow sports are usually the first step to learning about snow country wildlife, which is only as safe as knowledgeable people want it to be. Unfortunately knowledge is too often lacking, and skiing is perceived as detrimental too wildlife. Reality is that skiing in all its many forms, from ski lift resorts to far flung Scandinavian style ski touring, holds the keys to wildlife conservation and restoration. No amount of litigation can change this basic fact of life, although the Mineral King Case (from the Supreme Court of the United States) certainly changed the legal landscape for all environmental litigation. Mineral King's near miss at becoming another ski lift avalanche disaster area preceded Early Winters, another almost ski lift area which shares the honor of being a Supreme Court case, and is the last chapter of this book. Olympic National Park is the other ski history explored, so that the National Parks are given equal emphasis with America's National Forests and Canada's Crown Lands. An extensive bibliography also includes many electronically available sources. The language is not technical and no prior experience with either skiing or wildlife is presumed. The book is primarily written for both skiing and wildlife enthusiasts, who may not know much about each other. It is intended as a peace offering to hopefully prevent future ski wars and unnecessary trips through the legal system. That effort could be better spent restoring wildlife and the life support system of our circumpolar boreal forest.

Director of The Terminator, Aliens and Titanic, James Cameron's latest movie, Avatar, is the most viewed cinema release of all time, yet to date receives little academic attention. Filling the gap, editor of www.DeepFocusFilm.com, Bryn V. Young-Roberts, researches Avatar's historical and cultural relevance with its first in-depth examination while simultaneously discussing the Cameron oeuvre. From the perspective of historical contextualisation and cultural analysis we decipher its socially significant subtext, encouraging a view that Avatar is not exclusively a generic entertainment spectacle. Providing foundations for future studies, we examine the film as metaphor for the Iraq War, advocator of the Internet as liberation tool, and political stance to the Bush administration. Fear of the industrial-military complex, and romantic ideals of Class are also analysed. Ultimately, the volume summarizes Avatar in relation to Cameron's other work and how it fits into our larger, contemporary society.
