The Next Big Thing

For 30 years some of the most talented and bravest drivers have battled across the continents of the world to claim what is arguably motorsport's toughest prize: the World Rally Championship. Now a multi-million dollar, global technology battle and terrestrial television phenomenon played out over the frozen wastes of Finland, the dusty plains of Australia and the sun-kissed mountain roads of Corsica, the WRC has reached its 30th birthday. This book celebrates that important milestone and paints an exhaustively detailed picture of the people and personalities who have shaped this great sport. The Complete Book of the World Rally Champions provides a biographical account of the 65 men who have won at least one World Championship Rally since 1973. The biographies are compiled by the sport's leading writers and historians and complemented by stunning photography. The book includes a detailed and accurate statistical career record of each driver, plus highlights of all the significant cars.

Have you got something to complain about? Have you been short changed? Have you complained and got nothing but hollow apologies? Are you due compensation? Then this book could help. With eight years experience in a customer management role for a multi-national retailer, Peter realised that it was the light-hearted, entertaining letters that received the most satisfactory resolutions. 'I want to complain' explains exactly what life is like on the other end of the call-centre telephone. The second section of the book contains a collection of genuine complaint letters along with their replies so you can see for yourself just how it works. Those companies written to include Marks and Spencer, Tesco, Asda and even Newcastle city council to get a parking ticket revoked - all with positive resolutions. 'I want to complain' hopes to put the 'fun' into refund and the 'jest' into goodwill gesture as it takes you on an entertaining and humorous journey into the world of customer services.

The 206, one of the best selling European hot hatches, is proving a huge hit in the car modifying world. The amazing performance of the 206 on the rally circuits only adds to this car's integrity and with an extensive market of modifying goodies, modifications are a must.

Automotive Ethernet

Featuring a foreword by Bob Metcalfe, inventor of Ethernet! Ethernet, the most widely-used local area networking technology in the world, is moving from the server rooms of automobile manufacturers to their vehicles. As the quantity and variety of electronic devices in cars continues to grow, Ethernet promises to improve performance and enable increasingly powerful and useful applications in vehicles. Now, from Intrepid Control Systems (www.intrepidcs.com) - a leader in the world of automotive networking and diagnostic tools - comes the first book to describe the technology behind the biggest revolution in automotive networking since the 1980s: Automotive Ethernet - The Definitive Guide describes the fundamentals of networking, data link and physical layers of industry-standard Ethernet variants, as well as the new (one twisted pair 100Base Ethernet) 1TPCE or BroadR-Reach technology developed by Broadcom specifically for vehicle use. Topics covered include: in-vehicle networking requirements, comparing Ethernet to CAN and other existing networks (such as LIN, MOST, and FlexRay), TCP/UDP, IPv4/IPv6 and Diagnostics over IP (DoIP). Also covered are the Audio Video Bridging standards used to transport media over Ethernet: Stream Reservation Protocol or SRP (802.1Qat), Forward-Queueing and Time-Sensitive Streams or FQTSS (802.1Qav), Timing and Synchronization for Time-Sensitive Applications or gPTP (802.1as), and Transport Protocol for Time-Sensitive Applications or AVTP (IEEE 1722), and more. Automotive Ethernet: The Definitive Guide will also be available as an ebook for your Kindle!
