The story of the development of Taylor and Francis in this text is more than an isolated account of one small company - it throws light on the whole process of scientific communication during the last 200 years. In this bicentenary edition the story of the company's growth from the launch of the "Philosophical Magazine" and other scientific periodicals and books, into a significant academic publishing player is brought within the context of late 20th-century innovation and expansion.

This edition presents the extant journals of Pauline Clairmont (1825–1891) and Wilhelm Clairmont (1831–1895), the niece and nephew of Claire Clairmont (1798–1879) who was Mary Shelley's (1797–1851) stepsister. It also includes a journal originally attributed to Pauline but which likely was Walter Gaulis Clairmont's (1868–1958; Wilhelm's son). All three journals are currently deposited in the Carl H. Pforzheimer Collection of Shelley and His Circle at the New York Public Library. Pauline and Wilhelm spent many years living and working in places like Australia and the Banat and their adventures are recorded in their journals. Pauline wrote a series of sixteen journals cataloguing her life; however, except for one journal, all the remaining journals have been lost. Her extant journal, written primarily in English but with French and German entries, documents her struggles in the Australian outback during the 1850s and her relationship with William Henry Suttor, Junior, who would later become a pastoralist and a politician. Pauline's journal tells of her love for Suttor, her disappointment at his rejection, and her musings about her life in Australia. In his journal, Wilhelm chronicles his attempts to purchase a farm in Europe while Walter provides us with an account of his 8-day Austrian expedition. This new edition brings together these three journals, thereby extending our understanding of the Shelley-Clairmont family. The edition includes an introduction to the primary Godwin-Shelley-Clairmont circle and a

chapter on the history of life writing. The editor provides extensive editorial notes and carefully researched chapters to contextualize *The Clairmont Family Journals: 1855–1885*.

Presenting a survey of the social, cultural and theoretical issues which surround and inform our understanding of masculinity, this book explores the interface between traditional sociological approaches and the work covered by more post-structural, media-driven or cultural perspectives. Edwards well known for his work on representations of masculinities, uses grounded examples of the job market and domestic violence to set his theoretical discussion. He argues that there is a need for more dialogue on men and masculinities between disciplines, and considers the validity of the concerns and anxieties which surround masculinity in the contemporary world through a range of key topics, including: the new man, the new lad and 'men's movements' men, masculinity and violence marginalized masculinities: black masculinity and gay male sexuality queer theory, performativity and fashion cinema, representation and the body. One of the most comprehensive and progressive studies of modern masculinity available, this book will be essential reading for students of gender, culture and sociology.

Now in its second edition, this internationally best-selling book has been revised and updated. It focuses on helping people overcome some of the most common obstacles to successful publication. Lack of time? An unconscious fear of rejection? Conflicting priorities? In this, the first book to address the subject, Abby Day explains how to overcome these obstacles and create publishable papers for journals most likely to publish them. She shows how to identify a suitable journal and how to plan, prepare and compile a paper that will satisfy its requirements. She pays particular attention to the creative aspects of the process. As an experienced journal editor and publisher, Dr Day is well placed to reveal the inside workings of the reviewing procedure - and the more fully you understand this, the greater the chance that what you submit will be accepted and published. For academic and research staff, in whatever discipline, a careful study of Dr Day's book could be your first step on the road to publication. This book, first published in 1982, focuses on providing information about the policies and practices surrounding the preparation and submitting of articles to the major journals in library and information

science. This guide includes all the major American, Canadian, British, and international professional journals that solicit, accept and publish articles in the field.

Drawing on qualitative studies of team sport athletes and fraternity members, this book describes the rapidly changing world of masculinities among men in both the United States and Great Britain. As cultural homophobia decreases, university-aged men are influenced to construct a softer version of masculinity – one that is not predicated in homophobia. *Inclusive Masculinity* shows that today's youth express decreased sexism, racism and masculine bullying. As Eric Anderson demonstrates, men who value inclusive masculinities are also shown to be more likely to bond in emotional relationships with other men and to embrace a variety of behaviors once coded as feminine, including certain same-sex sexual behaviors. Now available in paperback, this groundbreaking analysis of masculinity and young men will be of interest to students and faculty members within Sociology, Gender Studies, and Sport Studies.

The last two decades have witnessed a proliferation of qualitative research in sport and exercise. *The Routledge Handbook of Qualitative Research in Sport and Exercise* is the first book to offer an in-depth survey of established and emerging qualitative methods, from conceptual first principles to practice and process. Written and edited by a team of world-leading researchers, and some of the best emerging talents, the book introduces a range of research traditions within which qualitative researchers work. It explores the different methods used to collect and analyse data, offering rationales for why each method might be chosen and guidance on how to employ each technique successfully. It also introduces important contemporary debates and goes further than any other book in exploring new methods, concepts, and future directions, such as sensory research, digital research, visual methods, and how qualitative research can generate impact. Cutting-edge, timely and comprehensive, *The Routledge Handbook of Qualitative Research in Sport and Exercise* is an essential reference for any student or scholar using qualitative methods in sport and exercise-related research.

The Academy of Management is proud to announce the inaugural volume of The Academy of Management Annals. This exciting new series follows one guiding principle: The advancement of knowledge is possible only by conducting a thorough examination of what is known and unknown in a given field. Such assessments can be accomplished through comprehensive, critical reviews of the literature—crafted

by informed scholars who determine when a line of inquiry has gone astray, and how to steer the research back onto the proper path. The Academy of Management Annals provide just such essential reviews. Written by leading management scholars, the reviews are invaluable for ensuring the timeliness of advanced courses, for designing new investigative approaches, and for identifying faulty methodological or conceptual assumptions. The Annals strive each year to synthesize a vast array of primary research, recognizing past principal contributions while illuminating potential future avenues of inquiry. Volume 1 of the Annals explores a wide spectrum of research: corporate control; nonstandard employment; critical management; physical work environments; public administration team learning; emotions in organizations; leadership and health care; creativity at work; business and the environment; and bias in performance appraisals. Ultimately, academic scholars in management and allied fields (e.g., sociology of organizations and organizational psychology) will see The Academy of Management Annals as a valuable resource to turn to for comprehensive, up-to-date information—published in a single volume every year by the preeminent association for management research.

Using a corpus of nearly 12,000 articles taken from 11 journals, this book addresses the key questions that surround writing for an interdisciplinary audience. This book also explores: the ways in which writers write if they are writing for an interdisciplinary audience as well as for a specialist disciplinary audience; the different natures and instances of the term 'interdisciplinarity'; and whether an analysis of the rhetorical contexts in which research is relayed to interdisciplinary audiences is critical to understanding interdisciplinary research activities and communications. Written by two leading figures in the field of Corpus Linguistics, this is an essential text for researchers and upper-level undergraduates working in the areas of Corpus Linguistics, Discourse Analysis and Linguistics in areas of interdisciplinary communication.

Medical Journals and Medical Knowledge

It is a turbulent time for STM publishing. With moves towards open access to scientific literature, the future of medical journals is uncertain and unpredictable. This is the only book of its kind to address this problematic issue. Richard Smith, a previous editor of the British Medical Journal for twenty five years and one of the most influential people within medical journals and medicine depicts a compelling picture of medical publishing. Drawn from the author's own extensive and unrivalled experience in medical publishing, Smith provides a refreshingly honest analysis of current and future trends in journal publishing including peer review, ethics in medical publishing, the influence of the pharmaceutical industry as well as that of the mass media, and the risk that money can cloud objectivity in publishing. Full of personal anecdotes and amusing tales, this is a book for everyone, from researcher to patient, author to publisher and editor to reader. The controversial and highly topical nature of this book, will make uncomfortable reading for publishers, researchers, funding bodies and pharmaceutical companies alike making this useful resource for anyone with an interest in medicine or medical journals. Topic covered include: Libel and medical journals; Patients and medical journals; Medical journals and the mass media; Medical journals and pharmaceutical companies: uneasy bedfellows; Editorial

independence; misconduct; and accountability; Ethical support and accountability for journals; Peer review: a flawed process and Conflicts of interest: how money clouds objectivity. The collapse of Lehman Brothers, the oldest and fourth-largest US investment bank, in September 2008 precipitated the global financial crisis. This deepened the contraction in economic activity that had already started in December 2007 and has become known as the Great Recession. Following a sluggish and uneven period of recovery, levels of private debt have recently been on the rise again making another financial crisis almost inevitable. This book answers the key question: can anything be done to prevent a new financial crisis or minimize its impact? The book opens with an analysis of the main elements responsible for the 2007/2009 financial crisis and assesses the extent to which they are still present in today 's financial system. The responses to the financial crises - particularly the Dodd-Frank Act, the establishment of the Financial Stability Board, and attempts to regulate shadow banking – are evaluated for their effectiveness. It is found that there is a high risk of a new bubble developing, there remains a lack of transparency in the financial industry, and risk-taking continues to be incentivised among bankers and investors. Proposals are put forward to ameliorate the risks, arguing for the need for an international lender of last resort, recalling Keynes' idea for an International Clearing Union. This book will be of significant interest to scholars and students of financial crises, financial stability, and alternative approaches to finance and economics.

- A supplementary guide for students who are learning how to evaluate reports of empirical research published in academic journals.
- Your students will learn the practical aspects of evaluating research, not just how to apply a laundry list of technical terms from their textbooks.
- Each chapter is organized around evaluation questions. For each question, there is a concise explanation of how to apply it in the evaluation of research reports.
- Numerous examples from journals in the

social and behavioral sciences illustrate the application of the evaluation questions. Students see actual examples of strong and weak features of published reports. • Commonsense models for evaluation combined with a lack of jargon make it possible for students to start evaluating research articles the first week of class. • The structure of this book enables students to work with confidence while evaluating articles for homework. • Avoids oversimplification in the evaluation process by describing the nuances that may make an article publishable even though it has serious methodological flaws. Students learn when and why certain types of flaws may be tolerated. They learn why evaluation should not be performed mechanically. • This book received very high student evaluations when field-tested with students just beginning their study of research methods. • Contains more than 60 new examples from recently published research. In addition, minor changes have been made throughout for consistency with the latest edition of the Publication Manual of the American Psychological Association.

Strategies for Getting Published

'Baverstock is to book marketing what Gray is to anatomy; the undisputed champion.' Richard Charkin, Executive Director of Bloomsbury Publishing and President Elect of the International Publishers Association Over four editions, Alison Baverstock's How to Market Books has established itself as the industry

standard text on marketing for the publishing industry, and the go-to reference guide for professionals and students alike. With the publishing world changing like never before, and the marketing and selling of content venturing into uncharted technological territory, this much needed new edition seeks to highlight the role of the marketer in this rapidly changing landscape. The new edition is thoroughly updated and offers a radical reworking and reorganisation of the previous edition, suffusing the book with references to online/digital marketing. The book maintains the accessible and supportive style of previous editions but also now offers: a number of new case studies detailed coverage of individual market segments checklists and summaries of key points several new chapters a foreword by Michael J Baker, Professor Emeritus of Marketing, Strathclyde University.

Originally published in 1992 *Medical Journals and Medical Knowledge* examines both broad developments in print and media and the practice of particular journals such as the *British Medical Journal*. The book is the first study to address these questions and to examine the impact of regular news on the making of the medical community. The book considers the rise of the medical press, and looks at how it recorded and described principal developments and so promoted medical science and enhanced medical consciousness. This book was a seminal work when first published and was one of the first to consider the importance of the roots of medical journalism, editorial practices and the ways in which the medical journalism altered the world of medicine.

Fully updated with important new theory and practical material, this second edition of *Learning Journals* offers guidance on keeping and using journals and gives step-by-step advice on integrating journal writing on taught courses, in training and professional development and in supporting personal development planning (PDP) activities. Key topics covered include: the nature of learning journals and how we learn from them the broad range of uses of learning journals, including portfolios and personal and professional development the depth and quality of reflection in learning journals the assessment of learning journals and reflective writing the use of narrative and story-telling techniques in journals. With useful exercises and activities that enhance learning journal work in a structured manner, *Learning Journals* is invaluable reading for teachers and students in higher education, for all professionals, particularly those working in the health services and business and training and for all those who want to learn more about keeping a fulfilling personal journal.

To keep the global average temperature from rising further than 2°C, emissions must peak soon and then fall steeply. This book examines how such rapid mitigation can proceed – in the scale and speed required for effective climate action – using an analogy provided by the mobilisation for a war that encompassed nations, the Second World War. *Strategies for Rapid Climate Mitigation* examines the wartime-climate analogy by drawing lessons from

wartime mobilisations to develop contingency plans for a scenario where governments implement stringent mitigation programs as an 'insurance policy' where we pay for future benefits. Readers are provided a picture of how these programs could look, how they would work, what could trigger them, and the challenges in execution. The book analyses in detail one plausible approach to a crucial issue - an approach built upon knowledge of climate science and on proven and demonstrated mitigation measures. The book is meshed with a social and political analysis that draws upon narratives of mobilisations during the war to meet a transnational threat, while also addressing the shortcomings of the analogy and its strategies. The book will be of great interest to scholars, students, and practitioners of public policy, climate policy, energy policy, international relations, and strategic studies.

The chapters are ordered to develop a systematic approach to the process, including such topics as: The writer The reader What's the contribution? This guide offers detailed advice on the journal article publication process, describing each step of the process and providing insights for improving the presentation of work intended for publication in communication journals. It includes advice from journal editors across the discipline and offers resource materials to help both new and seasoned writers publish their work. The guide begins with an overview of the publication process, followed by a discussion of each step of the manuscript submission, review, and revision processes. In addition to reality-based answers to questions often posed to editors, resource materials are provided in the appendices, introducing readers to the various forms and correspondence they will encounter when they submit their work for consideration. The guide focuses on the issues and

procedures associated with the publication process, examining rules and expectations encountered during the publishing process that are often assumed to be known but are rarely articulated. The guidance provided here will aid in establishing consistency in publication practices and will contribute toward improving the quality of journal submissions, as well as enhancing interaction with editors and reviewers. As a guide to demystifying procedures associated with the publication process, this resource will serve all academic authors desiring to publish their work in scholarly communication journals. Written specifically for teachers, *Motivating Students to Learn* offers a wealth of research-based principles on the subject of student motivation for use by classroom teachers. Now in its fourth edition, this book discusses specific classroom strategies by tying these principles to the realities of contemporary schools, curriculum goals, and classroom dynamics. The authors lay out effective extrinsic and intrinsic strategies to guide teachers in their day-to-day practice, provide guidelines for adapting to group and individual differences, and discuss ways to reach students who have become discouraged or disaffected learners. This edition features new material on the roles that classroom goal setting, developing students' interest, and teacher-student and peer relationships play in student motivation. It has been reorganized to address six key questions that combine to explain why students may or may not be motivated to learn. By focusing more closely on the teacher as the motivator, this text presents a wide range of motivational methods to help students see value in the curriculum and lessons taught in the classroom.
