Eagles have fascinated humans for millennia. For some, the glimpse of a distant eagle instantly becomes a treasured lifelong memory. Others may never encounter a wild eagle in their lifetime. This book was written by people who have dedicated years to the study of eagles, to provide an insider's view for all readers, but especially those who have never been up close and personal with these magnificent yet often misunderstood creatures. In their stories, twenty-nine leading eagle researchers share their remarkable field experiences, providing personal narratives that don't feature in their scientific publications. They tell of their fear at being stalked by grizzly bears, their surprise at being followed by the secret police, their embarrassment when accidentally firing mortar rockets over a school gymnasium, and their sense of awe at tracking eagles via satellite. The reader experiences the cultural shock of being guest of honor at a circumcision ceremony, the absurdity of sharing an aquatic car with the Khmer Rouge, and the sense of foreboding at being press-ganged into a frenzied tribal death march through the jungle. The Eagle Watchers covers twenty-four species on six continents, from well known (bald eagle; golden eagle), to obscure (black-and-chestnut eagle; New Guinea harpy eagle), and from common (African fish eagle) to critically endangered (Philippine eagle; Madagascar fish eagle). The diverse experiences vividly described in this book reveal the passion, dedication, and sense of adventure shared by those who study these majestic birds and strive for their conservation. Featuring stunning color photographs of the eagles, information on raptor conservation, a global list of all eagle species with ranges and conservation status, and a color map of the sites visited in the book, The Eagle Watchers will appeal to birders, conservationists, and adventure travelers alike. To further support the conservation programs described in this book, all royalties are being donated to two leading nonprofit organizations for raptor conservation training and fieldwork: Hawk Mountain Sanctuary Intern Program and the National Birds of Prey Trust.

Bubble Head is a Crested Polish Banty - One Slick Chick - and a strange-looking chicken that takes on a crafty fox in the first part of this children's adventure book. "I happen to be a stunning chicken. I allow these humans to pet my lovely feathers and tell me I'm one hot chicken, but of course I know this. It's obvious I'm a chicken worth pick-en." Whether she's strange-looking or lovely, this hip chick will delight young readers as she takes on some worthy adversaries, including a killer fox, and a large snapping spider that appears on Halloween (and if it bites, you become the spider). Does Bubble Head come out on top?

"The Cold War . . . was a fight to the death," notes Thomas C. Reed, "fought with bayonets, napalm, and high-tech weaponry of every sort—save one. It was not fought with nuclear weapons." With global powers now engaged in cataclysmic encounters, there is no more important time for this essential, epic account of the past half century, the tense years when the world trembled **At the Abyss**. Written by an author who rose from military officer to administration insider, this is a vivid, unvarnished view of America's fight against Communism, from the end of WWII to the closing of the Strategic Air Command, a work as full of human interest as history, rich characters as bloody conflict. Among the unforgettable figures who devised weaponry, dictated policy, or deviously spied and subverted: Whittaker Chambers—the translator whose book, *Witness*, started the hunt for bigger game: Communists in our government; Lavrenti Beria—the head of the Soviet nuclear weapons program who apparently killed Joseph Stalin; Col. Ed Hall—the leader of America's advanced missile system, whose own brother was a Soviet spy; Adm. James Stockwell—the prisoner of war and eventual vice presidential candidate who kept his terrible secret from the Vietnamese for eight long years; Nancy Reagan—the "Queen of Hearts," who was both loving wife and instigator of palace intrigue in her husband's White House. From Eisenhower's

decision to beat the Russians at their own game, to the “Missile Gap” of the Kennedy Era, to Reagan’s vow to “lean on the Soviets until they go broke”—all the pivotal events of the period are portrayed in new and stunning detail with information only someone on the front lines and in backrooms could know. Yet *At the Abyss* is more than a riveting and comprehensive recounting. It is a cautionary tale for our time, a revelation of how, “those years . . . came to be known as the Cold War, not World War III.”

The Chemical Physics of Fullerenes 10 (and 5) Years Later

A Guide to Beauty, Skincare, Hair Care, Fashion and Confidence From the Sisters Who Started the Red Hair Revolution

A decade has elapsed since the discovery of C60 in molecular beams, and five years since the first synthesis of solid C60. At the time, the opening of a new era for chemistry was foreseen and high expectations were shared by physicists and material scientists. Where are we now? Where are we aiming? What can we expect from now on? The answer will be found in this volume, written by the protagonists of the fullerene adventure. There is a whole new generation of materials now, in the form of molecules, solids, nanostructures, either directly derived from Bucky or inspired by it. They continue to create new challenges to our fundamental understanding and seem to be ready for important, long-lasting applications. Audience: The book is mainly directed to specialized scientists - physicists, chemists, material scientists and biochemists - who will find it a source of learning and inspiration. Younger researchers, too, will find it fascinating, since it allows them to learn about and quickly acquire a critical view of an interdisciplinary, frontier subject.

Two devout teenagers faced love amid tragedy circa 1969. An Army enlistment during the Vietnam Conflict promised career opportunities but tore their dreams apart. As a Roman Catholic, Nancy knew better than to succumb to temptation. She was following the example of her two older sisters: one a nun, and the other a wife who'd had three children in quick succession. But when a sweet-talking devilishly-handsome boy began charming her, it wasn't just her baton that was twirling. It was her heart. Peter knew he shouldn't resent his older brother, the golden boy. Terry excelled in sports, academics, and winning friends while Peter was stuck at home milking cows. Their parents expected Peter to hold down the farm when Terry's world was upended by an accident. Once Peter fell for a beautiful red-haired angel, he knew his prayers had been answered. Later, while Peter performed his patriotic duty in Vietnam, he discovered his brother was ambushing him on the home front, about to steal his cherished wife and daughter. Did his devotion to the Army's cause create an unbridgeable rift in his marriage? Return to the mythical Capital High School in Lincoln, Nebraska, for the third in the Twirler Quartet series that delivers more heartbreak and joy at a time when naïve teenage boys were being drafted, surprised college students were being attacked at protest marches, and the president promised peace and love to the youth of America.

With contributions from 20 collectors and scholars, the collections in this book range from 1840–1940, including camera obscuras and cyanotypes to autochromes, stereoscopes, daguerreotypes. Also included are American tintypes and ambrotypes, the miniature and intricate stanhopes, magic lanterns and other optical toys, megalethoscopes, and zoetropes, and many more. Each collector has written a meticulous study to introduce their photographic passion, and with over 500 images (most never before published) of cameras and photographs alike, the truly marvelous nature of the camera and the miraculous technologies that enabled them are revealed. The transcendence and "wonder of wonders!" that is ever present within photography can still be honestly and freshly felt today. This book is ideal for those who wish to study, and experience, the everlasting marvel of camera magic.
