UNLIKE TRADITIONAL TEXTBOOKS that can overwhelm the reader with countless facts to absorb, the Student’s Friend Concise World History highlights the most important developments of world history in a clear and concise manner that is capable of being comprehended by the human mind. Teachers have successfully used The Student’s Friend in homeschool, middle school, high school, and college in the United States and abroad. Part 1 covers the period from prehistory to the year 1500; Part 2, the period from 1500 to the present. In contrast to other concise histories that may focus on impersonal historical processes, the Student’s Friend includes men and women who helped to shape history and who illustrate timeless aspects of human nature. WHY A CONCISE HISTORICAL NARRATIVE? The Student’s Friend is designed to be consistent with findings from cognitive science that emphasize learning the most important principles and concepts of a school discipline, rather than learning large quantities of superficial facts that are likely to be forgotten shortly after the exam is over. The respected Bradley Commission on History in Schools has said, “The amount of time required to achieve student engagement and genuine comprehension of significant issues will necessitate leaving out much that is ‘covered’ by the usual text.” CONCISENESS CAN BRING CLARITY. Cognitive psychologist Frank N. Dempster has written, “Many texts are so packed with facts, names, and details that the real point of the lesson is often obscured.” One of the greatest benefits of a concise historical narrative is the clarity it can bring to a student’s understanding of history by focusing on essential knowledge rather than on extensive, sometimes confusing, and often-trivial detail. ELIMINATES GAPS AND DISCONTINUITIES. Teachers can’t adequately cover all the information contained in standard thousand-page textbooks, so they commonly skip around in the textbook, which can leave big holes in the historical narrative. The Student’s Friend is designed to include no more information than students can realistically cover during a standard high school course. Because the picking and choosing has been carefully done and logically sequenced, continuity is maintained and gaps eliminated. BALANCES BREADTH AND DEPTH. The concise historical narrative leaves time in the curriculum for additional learning activities such as research papers, multimedia presentations, source-analysis activities, and simulations, a practice sometimes called “postholing.” The narrative performs a unifying function like a fence that gives shape to the landscape and provides the connecting fabric between events, while postholes are occasions to dig more deeply into the human dimensions of history-to explore how events of the past affected people’s lives then and now. The subject matter of world history is so vast that it can be a difficult subject to grasp and to teach. Teachers and students alike can benefit from the understandable picture of history provided by the Student’s Friend Concise World History.

Helping students succeed in three main parts: class involvement activities, reading this book, and writing about your learning in an interactive notebook.

Teaching Mockingbird presents educators with the materials they need to transform how they teach Harper Lee’s classic novel To Kill a Mockingbird. Interweaving the historical context of Depression-era rural Southern life, and informed by Facing History’s pedagogical approach, this resource introduces layered perspectives and thoughtful strategies into the teaching of To Kill a Mockingbird. This teacher’s guide provides English language arts teachers with student handouts, close reading exercises, and connection questions that will push students to build a complex understanding of the historical realities, social dynamics, and big moral questions at the heart of To Kill a Mockingbird. Following Facing History’s scope and sequence, students will consider the identities of the characters, and the social dynamics of the community of Maycomb, supplementing their understanding with deep historical exploration. They will consider challenging questions about the individual choices that determine the outcome of Tom Robinson’s trial, and the importance of civic participation in the building a more just society. Teaching Mockingbird uses Facing History’s guiding lens to examine To Kill a Mockingbird, offering material that will enhance student’s literary skills, moral growth, and social development.

Baseball, basketball, football — no matter the game, Jackie Robinson excelled. His talents would have easily landed another man a career in pro sports, but in America in the 1930s and ’40s, such opportunities were closed to athletes like Jackie for one reason: his skin was the wrong color. Settling for playing baseball in the Negro Leagues, Jackie chafed at the inability to prove himself where it mattered most: the major leagues. Then in 1946, Branch Rickey, manager of the Brooklyn Dodgers, decided he was going to break the “rules” of segregation: he recruited Jackie Robinson. Fiercely determined, Jackie faced cruel and sometimes violent hatred and discrimination, but he proved himself again and again, exhibiting courage, restraint, and a phenomenal ability to play the game. In this compelling biography, award-winning author Doreen Rappaport chronicles the extraordinary life of Jackie Robinson and how his achievements won over — and changed — a segregated nation.

The Outsiders

Decades of research have demonstrated that the parent-child dyad and the environment of the familyâ€”which includes all primary caregiversâ€”are at the foundation of children’s well- being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child’s brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents’ lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents’ use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Current educational reforms have given rise to various types of “educational Taylorism,” which encourage the creation of efficiency models in pursuit of a unified way to teach. In history education curricula, this has been introduced through scripted textbook-based programs such as Teacher Curriculum Institute’s History Alive! and completely online curricula. They include the jargon of authentic methods, such as primary sources, cooperative learning, differentiated instruction, and access to technology; yet the craft of teaching is removed, and an experience that should be marked by discovery and reflection is replaced with comparatively empty processes. This volume provides systematic models and examples of ways that history teachers can compete with and effectively halt this transformation. The alternatives the authors present are based on collaborative models that address the art of teaching for pre-service and practicing secondary history teachers as well as collegiate history educators. Relying on original research, and a maturing body of secondary literature on historical thinking, this book illuminates how collaboration can create real historical learning.

“An outstanding book about CEOs who excelled at capital allocation.” Warren Buffett #1 on Warren Buffett’s Recommended Reading List, Berkshire Hathaway Annual Shareholder Letter, 2012 Named one of “19 Books Billionaire Charlie Munger Thinks You Should Read” in Business Insider. “A book that details the extraordinary success of CEOs who took a radically different approach to corporate management.” Charlie Munger, Vice-Chairman of Berkshire Hathaway Corporation “Thorndike explores the importance of thoughtful capital allocation through the stories of eight successful CEOs. A good read for any business leader but especially those willing to chart their own course.” Michael Dell, chairman of the board of directors and chief executive officer of Dell What makes a successful CEO? Most people call to mind a familiar definition: “a seasoned manager with deep industry expertise.” Others might point to the qualities of today’s so-called celebrity CEOs: charisma, virtuoso communication skills, and a confident management style. But what really matters when you run an organization? What is the hallmark of exceptional CEO performance? Quite simply, it is the returns for the shareholders of that company over the long term. In this refreshing, counterintuitive book, author Will Thorndike brings to bear the analytical wisdom of a successful career in investing, closely evaluating the performance of companies and their leaders. You will meet eight individualistic CEOs whose firms’ average returns outperformed the S&P 500 by a factor of twenty! In other words, an investment of \$10,000 with each of these CEOs, on average, would have been worth over \$1.5 million twenty-five years later. You may not know all their names, but you will recognize their companies: General Cinema, Ralston Purina, The Washington Post Company, Berkshire Hathaway, General Dynamics, Capital Cities Broadcasting, TCI, and Teledyne. In *The Outsiders*, you’ll learn the traits and methods striking for their consistency and relentless rationality that helped these unique leaders achieve such exceptional performance. Humble, unassuming, and often frugal, these “outsiders” shunned Wall Street and the press, and shied away from the hottest new management trends. Instead, they shared specific traits that put them and the companies they led on winning trajectories: a laser-sharp focus on per share value as opposed to earnings or sales growth; an exceptional talent for allocating capital and human resources; and the belief that cash flow, not reported earnings, determines a company’s long-term value. Drawing on years of research and experience, Thorndike tells eye-opening stories, extracting lessons and revealing a compelling alternative model for anyone interested in leading a company or investing in one—and reaping extraordinary returns.

Winner of the Whitbread Book of the Year ‘Outstanding...a stunningly good read’ Observer ‘Mark Haddon’s portrayal of an emotionally dissociated mind is a superb achievement... Wise and bleakly funny’ Ian McEwan *The Curious Incident of the Dog in the Night-Time* is a murder mystery novel like no other. The detective, and narrator, is Christopher Boone. Christopher is fifteen and has Asperger’s Syndrome. He knows a very great deal about maths and very little about human beings. He loves lists, patterns and the truth. He hates the colours yellow and brown and being touched. He has never gone further than the end of the road on his own, but when he finds a neighbour’s dog murdered he sets out on a terrifying journey which will turn his whole world upside down.

“An artfully told story . . . The history, the land, and the determination of a band of refugees to care for each other are vividly evoked in this important work.” -- Starred review, Kirkus Reviews In the dry spring of 1999, eleven-year-old Stephen Majok watches as his friend Wol joins a circle of dancers. Wol is celebrating – only fourteen, he is engaged to Stephen’s sister. Wol wants to marry because he might join the guerrillas in southern Sudan and fight the northern government soldiers. He wants a wife to remember him. Stephen thinks Wol is crazy. Children should study. But because of the civil war, there has been no school in their village for over a year. All Stephen has left from his student days is his books and one precious pencil, and the hunger for knowledge. Then, suddenly – but not unexpectedly – exploding bombs are heard in the tiny village. Stephen’s mother tells him to hurry, pack his bag, and hide beyond the forest with Wol and their friend Deng. Stephen grabs his geography book, his pencil, and little else. He does not want to leave his mother and sister. He does not want to leave the life he loves. In her latest portrayal of “children caught in the cultural crossfire” (*School Library Journal*), Alice Mead emphasizes the attachment all humans have to the small place on earth we call home, and our resistance to being displaced, even when our very lives are threatened.

As seen in the award-winning feature film, *Lady Bird*. A classic since its original landmark publication in 1980, Howard Zinn’s *A People’s History of the United States* is the first scholarly work to tell America’s story from the bottom up the point of view. There is an underside to every age about which history does not often speak, because history is written from records left by the privileged. Historian and social activist Howard Zinn relays history in the words of America’s women, factory workers, African Americans, Native Americans, working poor, and immigrant labourers. From Columbus to the Revolution to slavery and the Civil War – from World War II to the election of George W. Bush and the “War on Terror” – *A People’s History of the United States* is an important and necessary contribution to a complete and balanced understanding of American history. ‘A brilliant and moving history of the American people from the point of view of those who have been exploited politically and economically and whose plight has been largely omitted from most histories.’ – *Library Journal*
