Every day, chefs across the globe churn out enormous amounts of high-quality work with efficiency using a system called mise-en-place—a French culinary term that means “putting in place” and signifies an entire lifestyle of readiness and engagement. In Everything in Its Place, Dan Charnas reveals how to apply mise-en-place outside the kitchen, in any kind of work. Culled from dozens of interviews with culinary

Based on her extensive experience in the urban communities of Los Angeles, historian and architect Dolores Hayden proposes new perspectives on gender, race, and ethnicity to broaden the practice of public history and public art, enlarge urban preservation, and reorient the writing of urban history to spatial struggles. In the first part of *The Power of Place*, Hayden outlines the elements of a social history of urban space to connect people's lives and livelihoods to the urban landscape as it changes over time. She then explores how communities and professionals can tap the power of historic urban landscapes to nurture public memory. The

Through public meetings, walking tours, artists's books, and permanent public sculpture, as well as architectural preservation, teams of historians, designers, planners, and artists worked together to understand, preserve, and commemorate urban landscape history as African American, Latina, and Asian American families have experienced it. One project celebrates the urban homestead of Bidy Mason, an African American ex-slave and midwife active between 1856 and 1891. Another reinterprets the Embassy Theater where Rose

Routes and Realms explores the ways in which Muslims expressed attachment to land from the ninth through the eleventh centuries, the earliest period of intensive written production in Arabic. In this groundbreaking first book, Zayde Antrim develops a "discourse of place," a framework for approaching formal texts devoted to the representation of territory across genres. The discourse of place included such varied works as topographical histories, literary anthologies, religious treatises, world geographies, poetry, travel literature, and maps. By closely reading and analyzing these

She contends that these are evidence of the powerful ways in which the geographical imagination was tapped to declare loyalty and invoke belonging in the early Islamic world, reinforcing the importance of the earliest regional mapping tradition in the Islamic world. *Realms* challenges a widespread tendency to underestimate the importance of territory and to over-emphasize the importance of religion

And while it feels freeing to be able to try something new whenever we want--whether it's a new job, a new city, a new group of friends, or even a new church--somewhere along the way, we discover we're missing something. In *The Power of Place*, pastor Daniel Grothe speaks to the human ache for home and makes a countercultural case for staying put. He calls us to reject the myth of Christian individuality and instead embrace the richness of commitment and community, arguing that we must stay in one place as long as we can, plant our lives, and let roots take hold. Because only then can we experience the deep fulfillment, friendship, and fruitfulness God created us for.

Most urban planning and design decisions, even those on a small scale, will remain in the urban built form for many decades, conditioning people’s experience of their city. It is important that these decisions are made using the best available knowledge. Tim Marshall, the New York Times bestselling author of *Prisoners of Geography*, offers “ a readable primer to many of the biggest problems facing the world ” (Daily Express, UK) by examining the borders, walls, and boundaries that divide countries and their populations. The globe has always been a world of walls, from the Great Wall of China to Hadrian ’ s Wall to the Berlin Wall. But a new age of isolationism and economic nationalism is upon us, visible in Trump ’ s obsession with building a wall on the Mexico border, in Britain ’ s Brexit vote, and in many other places as well. China has the great Firewall, holding back Western culture. Europe ’ s countries are walling themselves against immigrants, terrorism, and currency issues. South Africa has

heavily gated communities, and massive walls or fences separate people in the Middle East, Korea, Sudan, India, and other places around the world. In fact, more than a third of the world ' s nation-states have barriers along their borders.

Understanding what is behind these divisions is essential to understanding much of what ' s going on in the world today.

Written in Tim Marshall ' s brisk, inimitable style, *The Age of Walls* is divided by geographic region. He provides an engaging context that is often missing from political discussion and draws on his real life experiences as a reporter from hotspots around the globe. He examines how walls, borders, and barriers have been shaping our political landscape for hundreds of years, and especially since 2001, and how they

figure in the diplomatic relations and geo-political events of today. “ Marshall is a skilled explainer of the world as it is, and geography buffs will be pleased by his latest ” (Kirkus Reviews). “ Accomplished, well researched, and pacey... The Age of Walls is for anyone who wants to look beyond the headlines and explore the context of some of the biggest challenges facing the world today, it is a fascinating and fast read ” (City AM, UK).

"Place: it's where we're from; it's where we're going. . . . It asks for our attention and care. If we pay attention, place has much to teach us." With this belief as a foundation, The Power of Place offers a comprehensive and compelling case for making communities the locus of learning for students of all ages and

backgrounds. Dispelling the notion that place-based education is an approach limited to those who can afford it, the authors describe how schools in diverse contexts—urban and rural, public and private—have adopted place-based programs as a way to better engage students and attain three important goals of education: student agency, equity, and community. This book identifies six defining principles of place-based education. Namely, it

1. Embeds learning everywhere and views the community as a classroom.
2. Is centered on individual learners.
3. Is inquiry based to help students develop an understanding of their place in the world.
4. Incorporates local and global thinking and investigations.
5. Requires design thinking to find solutions to authentic problems.
6. Is

interdisciplinary. For each principle, the authors share stories of students whose lives were transformed by their experiences in place-based programs, elaborate on what the principle means, demonstrate what it looks like in practice by presenting case studies from schools throughout the United States, and offer action steps for implementation. Aimed at educators from preK through high school, *The Power of Place* is a definitive guide to developing programs that will lead to successful outcomes for students, more fulfilling careers for teachers, and lasting benefits for communities.

A journey of healing takes Clare Cooper Marcus on a 6-month long solitary retreat to the remote Scottish Island of Iona. Here she experiences a mirroring of her soul and reflects and reviews the life that brought her here to this magical place. Her compelling memoir Iona Dreaming is an inspirational account of personal survival and hope in

which Clare shares her recovery from a life-threatening illness, which deepens into a contemplation of the events in her life and her physical, emotional and spiritual healing. Clare Cooper Marcus brings both a personal and academic life-long interface with place, environment and people. Her five previous books about human response to architecture and environment were popular with the public and well-received by the press. *Iona Dreaming* will reach out to a broad audience: people entering retirement, dealing with serious illnesses, gardeners, lovers of nature, architects and landscape architects, people who are becoming more health conscious, women who have shared the social and cultural shifts she lived through - especially those coming of age in

the 60's - and all those who seek a more authentic life. During the 1920s, the Chicago school of sociology developed an ecological orientation toward the study of the city. At the same time, other Chicago scholars developed the social psychological approach that was to be named symbolic interactionism. Over fifty years later, Gordon Ericksen examines the best of these two schools to present a revisionist human ecology. In *The Territorial Experience*, he gives us a fresh perspective on human ecology by reconstructing the discipline in a way that genuinely reflects the realities of our territorial life. Ericksen's symbolic interactionist approach to the spatial world is based on the appreciation of humans as the

creative artists they are, as designers and builders of their environment. Exploring the symbolic meanings attached to space and territory, he challenges the orthodox in human ecology by introducing hypotheses and conceptual tools of analysis which link spatial facts to human motivations and meanings. With people living in a habitat which they have largely shaped for themselves—a world of airports, shopping malls, retirement villages, where human spaces convey human messages—Ericksen demands that we examine what we have done with our environment in order to survive and prosper. This major contribution to human ecology will be of importance to specialists and lay readers in the fields of sociology, social psychology, geography, city
